E6.3.1 Common Switching (BellSouth SWA FG Customers Only) (Cont'd)

(T)

A. (Cont'd)

2. Uniform Call Distribution Arrangement

This option provides a type of multiline hunting arrangement which provides for an even distribution of calls among the available lines in a hunt group. **BellSouth SWA** FGA services with different methods of providing off-hook supervisory signaling (i.e., provided by the customer's equipment vs. forwarded by the customer's equipment when the called party answers) cannot be mixed in the same hunt group arrangement. This feature, available with **BellSouth SWA FGA**, is provided from suitably equipped Company offices.

SECTION 9 (1)

BY: Jordan C. Neel
FOR THE PUBLIC SERVICE COMMISSION

E6. BELLSOUTH SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.1 Common Switching (BellSouth SWA FG Customers Only) (Cont'd)

A. (Cont'd)

3. Nonhunting Number for use with Hunt Group or Uniform Call Distribution Arrangement

This option provides an arrangement for an individual line within a multiline hunt or uniform call distribution group that provides access to that line within the hunt or uniform call distribution group when it is idle or provides busy tone when it is busy, when the nonhunting number is dialed. This feature, available with BellSouth SWA FGA, is provided from suitably equipped Company offices.

4. Automatic Number Identification (ANI) /Charge Number (CN)

This option provides the automatic transmission of a three, seven or ten digit number and information digits to the customer's premises for calls originating in the LATA, to identify the geographical calling area (NPA) or calling station ANI will identify the calling station, where possible, or at a minimum, identify the NPA from which the call originated. The three, seven or ten digit numbers will contain the following information: for three digit numbers, NPA only; for seven digit numbers, NXX+XXXX; for ten digit numbers, NPA+NXX+XXXX. With the exception of three digit ANI, the ANI feature is an end office software function which is associated on a call-by-call basis with (1) all individual transmission paths in a trunk group routed directly between an end office and a customer's premises or, where technically feasible, with (2) all individual transmission paths in a trunk group between an end office and an access tandem, and a trunk group between an access tandem and a customer's premises.

Three digit ANI is a software function of the SSP feature which is used in conjunction with BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service and occurs whenever the SSP feature detects an BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service call that does not include the originating caller's ANI.

Three digit ANI, the originating NPA of the 800 call, is available with BellSouth SWA FGD service routed traffic only. Three digit ANI will be transmitted to the customer on all BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service calls that are processed by the SSP feature for which a complete ANI is not received from the subtending office that originates the 800 call. This includes, but is not limited to: (1) non equal access end offices which have their call recording function performed at a location other than the office which is performing the BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service function, (2) calls from non equal access switches that encounter an ANI failure; and (3) ANI failures from non equal access switches which have their call recording function performed by the office which supports the BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service function.

The seven digit ANI telephone number is available with BellSouth SWA FGB and BellSouth SWA FGC. With these BellSouth SWA FGs, technical limitations may exist in Company switching facilities which require ANI to be provided only on a directly trunked basis. ANI will be transmitted on all calls except those originating from multiparty lines, pay telephone *lines* using BellSouth SWA FGB, or when an ANI failure has occurred.

The ten digit ANI telephone number is only available with BellSouth SWA FGD with multifrequency address signaling. When the BellSouth SWA CCSAC optional feature is specified, the customer may obtain an ANI equivalent by ordering the Charge Number optional feature, as specified following. The ten digit ANI telephone number consists of the Numbering Plan Area (NPA) plus the seven digit ANI telephone number. The ten digit ANI telephone number will be transmitted on all calls except those identified as multiparty line or ANI failure, in which case only the NPA will be transmitted (in addition to the information digit described following).

E6. BELLSOUTH SWA SERVICE

(T)

E6.3 Local Switching Optional Features (Cont'd)

E6.3.1 Common Switching (BellSouth SWA FG Customers Only) (Cont'd)

(T)

A. (Cont'd)

4. Automatic Number Identification (ANI) /Charge Number (CN) (Cont'd)

Generally, the three digit and ten digit ANI telephone number is available with **BellSouth SWA** FGD service, and with **BellSouth SWA 8XX Toll Free Dialing** Ten Digit Screening service that uses **BellSouth SWA** FGD service on a per class of service basis. The ten digit ANI number will be transmitted on calls except those where ANI cannot be provided because the conditions, set forth following exist or, those calls from end offices not equipped to provide ANI. In these instances, only the three digit ANI and the information digits described following, if applicable, will be transmitted. Additionally, when the customer has ordered the 800 to POTS Number Delivery feature, information digits (i.e., 24) which identify the call as an 800 call, will be forwarded to the customer's premises in addition to the ten digit POTS number. These information digits will also replace the information digits which identify the conditions set forth as follows when a POTS number is delivered to the customer's premises.

(T)

With **BellSouth SWA FGC**, ANI is provided from end offices at which Company recording for end user billing is not provided, or where it is not required. It is not provided from end offices for which the Company needs to forward ANI to its recording equipment.

(T)

Where ANI cannot be provided, e.g., on calls from 4- and 8-party services, information digits will be provided to the customer.

The information digits identify:

- Telephone number is the station billing number - no special treatment required,
- Multiparty line - telephone number is a 4- or 8-party line and cannot be identified - number must be obtained via an operator or in some other manner,
- ANI failure has occurred in the end office switch which prevents identification of calling telephone number - must be obtained by operator or in some other manner,
- Hotel/motel originated call which requires room number identification,
- Coinless station, hospital, inmate, etc., call which requires special screening or handling by the customer, and

FOR THE PUBLIC SERVICE COMMISSION

E6. BELLSOUTH SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.1 Common Switching (BellSouth SWA FG Customers Only) (Cont'd)

A. (Cont'd)

4. Automatic Number Identification (ANI) /Charge Number (CN) (Cont'd)

Call is an Automatic Identified Outward Dialed (AIOD) call from customer premises equipment. The ANI telephone number is the listed telephone number of the customer and is not the telephone number of the calling party.

These ANI information digits are available with BellSouth SWA FGB, BellSouth SWA FGC and BellSouth SWA FGD. Charge Number (CN) is an ANI equivalent which provides for the automatic transmission of the ten-digit billing number of the calling station number and originating line information. The specific protocol for CN is contained in the BellSouth Guidelines to Technical Publication TR-TSV-000905. This feature is available only with BellSouth SWA FGD when BellSouth SWA CCSAC is specified.

E6.3.2 Common Switching (BellSouth SWA FG and BellSouth SWA Basic Serving Arrangement Customers)

A. These optional features are available to BellSouth SWA FG and BellSouth SWA Basic Serving Arrangement customers (as specified in the descriptions) at no additional charge.

1. Call Denial on Line or Hunt Group

This option allows for the screening of terminating calls within the LATA, and for the completion only of calls to 411, 611, 911, 800, 555-1212, and a Company specified set of NXXs within the Company local exchange calling area of the dial tone office in which the arrangement is provided. All other "toll" calls are routed to a reorder tone or recorded announcement. This feature is provided in all Company electronic end offices and, where available, in electromechanical end offices. It is available with BellSouth SWA FGA and BellSouth SWA LSBSA.

2. Service Code Denial on Line or Hunt Group

This option allows for the screening of terminating calls within the LATA, and for disallowing completion of calls to 0-, 555 and N11 (e.g., 411, 611 and 911). This feature is provided where available in all Company electronic end offices and electromechanical end offices. It is available with BellSouth SWA FGA and BellSouth SWA LSBSA.

3. Enhanced Call Denial On Line Or Hunt Group

This option allows for the screening of terminating BellSouth SWA FGA and BellSouth SWA LSBSA calls for the completion of calls within the LATA of the dial tone office in which the arrangement is provided. Calls will be completed to 411, 611, 911, 800, 555-1212, and NXXs within the LATA of the dial tone office in which the arrangement is provided. Calls will not be completed to 950- 0XXX, 950-1XXX, 101XXXX, interLATA operator assistance (0+, 00-), operator assistance (0-), 1 + interLATA, 0/1 + 700 and 900. This feature is provided in all Company electronic end offices and, where available, in electromechanical end offices and is only available with BellSouth SWA FGA and BellSouth SWA LSBSA. (C)

4. Up to 7 Digit Outpulsing of Access Digits to Customer

This option provides for the end office capability of providing up to 7 digits of the uniform access code (950-0XXX or 950-1XXX) to the customer's premises. The customer can request that only some of the digits in the access code be forwarded. The access code digits would be provided to the customer's premises using multifrequency signaling, and transmission of the digits would precede the forwarding of ANI if that feature were provided. It is available with BellSouth SWA FGB and BellSouth SWA TSBSA 1.

E6. BELLSOUTH SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.2 Common Switching (BellSouth SWA FG and BellSouth Basic Serving Arrangement Customers) (Cont'd)

A. (Cont'd)

5. Alternate Traffic Routing

a. Multiple Customer Premises Alternate Routing

This option provides the capability of directing originating traffic from an end office (or appropriately equipped access tandem) to a trunk group (the "high usage" group) to a customer designated premises until that group is fully loaded, and then delivering additional originating traffic (the "overflowing" traffic) from the same end office or access tandem to a different trunk group (the "final" group) to a second customer designated premises. The customer shall specify the last trunk CCS desired for the high usage group. It is provided in suitably equipped end office or access tandem switches and is available with BellSouth SWA FGC, BellSouth SWA FGD and BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3. Due to technical limitations, this option is not available with the routing of sent-paid coin traffic.

b. End Office Alternate Routing When Ordered In Trunks

This option provides an alternate routing arrangement for customers who order in trunks and have access for a particular BellSouth SWA FG or BellSouth SWA Basic Serving Arrangement to an end office via two routes: one route via an access tandem and one direct route. The feature allows the customers' originating traffic from the end office to be offered first to the direct trunk group and then overflow either to an access tandem group or, where facilities permit, to another direct trunk group equipped with tandem signaling. It is provided in suitably equipped end offices and is available with BellSouth SWA FGB, BellSouth SWA FGC, BellSouth SWA FGD and BellSouth SWA TSBSA. Due to technical limitations, this option is not available with the routing of sent-paid coin traffic. This option is available for use in providing BellSouth SWA 500 Access Service and BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service only when the end office is equipped to perform the BellSouth SWA 500 or BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service.

6. Service Class Routing

This option provides the capability of directing originating traffic from an end office to a trunk group to a customer-designated premises, based on the line class of service (e.g., *pay telephone*, multiparty or hotel/motel), service prefix indicator (e.g., 0-, 0+, 01+ or 011+) or service access code (e.g., 500, 800 or 900). It is provided in suitably equipped end office or access/TOPS tandem switches and is available with BellSouth SWA FGC, D and BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3. (C)

7. Dial Pulse Address Signaling

This trunk side option provides for the transmission of number information, e.g., called number, between the end office switching system and the customer's premises (in either direction) by means of direct current pulses. It is available with BellSouth SWA FGC and BellSouth SWA TSBSA 2.

8. Revertive Pulse Address Signaling

This option provides for a dc pulsing arrangement that transmits intelligence in the following manner:

The equipment at the originating location presets itself to represent the number of pulses required and to count the pulses received from the terminating location.

The equipment at the terminating location transmits a series of pulses by the momentary grounding of its battery supply until the originating location breaks the dc path to indicate that the required number of pulses has been counted.

This option is available with BellSouth SWA FGC and BellSouth SWA TSBSA 2.

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

SECRETARY OF THE COMMISSION

E6. BELLSOUTH SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.2 Common Switching (BellSouth SWA FG and BellSouth SWA Basic Serving Arrangement Customers) (Cont'd)

A. (Cont'd)

9. Delay Dial Start-Pulsing Signaling

This option provides a method of indicating to the near end trunk circuit readiness to accept address signaling information by the far end trunk circuit. Delay dial is often referred to as an off-hook, on-hook signaling sequence. The delay dial signal is the off-hook interval and the start-pulsing signal is the on-hook interval. With integrity check, the calling office will not outpulse until a delay dial (off-hook) signal followed by a start-pulsing (on-hook) signal has been recorded at the calling office. This option is available with BellSouth SWA FGC and BellSouth SWA TSBSA 2.

10. Immediate Dial Pulse Address Signaling

This option provides for the forwarding of dial pulses from the Company end office to the customer without the need of a start-pulsing signal from the customer. It is available with BellSouth SWA FGC and BellSouth SWA TSBSA 2.

11. Trunk Access Limitation

This option provides for the routing of originating BellSouth SWA 900 service calls to a specified number of transmission paths in a trunk group, in order to limit (choke) the completion of such traffic to the customer. Calls to the designated service which could not be completed over the subset of transmission paths in the trunk group, i.e., the choked calls, would be routed to reorder tone. It is provided in all Company electronic end offices and where available in electromechanical end offices. It is available with BellSouth SWA FGC, BellSouth SWA FGD, BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3.

12. Call Gapping Arrangement

This option, provided in suitably equipped end office switches, provides for the routing of originating calls to BellSouth SWA 900 service to be switched in the end office to all transmission paths in a trunk group at a prescribed rate of flow, e.g., one call every five seconds, in order to limit (choke) the completion of such traffic to the customer. Calls to the designated service which are denied access by this feature, i.e., the choked calls, would be routed to a no-circuit announcement. It is provided in selected BellSouth SWA FGD and BellSouth SWA TSBSA 3 equipped end offices and is available only with BellSouth SWA FGD and BellSouth SWA TSBSA 3.

13. AccuPulse® service Switching Capability

This option provides for an end office or access tandem capability which allows a connection between the customer's premises and a suitably equipped end user premises utilizing end office or access tandem switching that is capable of transmitting 56 Kbps digital data. It is provided in suitably equipped electronic end offices or access tandems and is available only with BellSouth SWA FGD and BellSouth SWA TSBSA 3. This option is not available in combination with the BellSouth SWA CCSAC option.

14. Cut-Through

This option allows end users of the customer to reach the customer's premises by using the end of dialing digit (#). This option provides for connection of the call to the premises of the customer indicated by the 101XXXX code upon receipt of the end of dialing digit (#). The Company will not record any other dialed digits for these calls. This option is available with BellSouth SWA FGD and BellSouth SWA TSBSA 3.

15. Calling Party Number (CPN)

This option provides for the automatic transmission of the calling party's ten-digit telephone number to the customer's premises for calls originating in the LATA. The ten-digit telephone number consists of the NPA plus the seven-digit telephone number, which may or may not be the same number as the calling station's charge number. The specific protocol for CPN is contained in the BellSouth Guidelines to Technical Publication TR-TSV-000905. This feature is available only with BellSouth SWA FGD and BellSouth SWA TSBSA 3 when the BellSouth SWA CCSAC option is specified.

16. Carrier Selection Parameter (CSP)

This option provides for the automatic transmission of a signaling indicator which signifies to the customer whether the call being processed originated from a subscribed end user of that customer. The specific protocol for CSP is contained in the BellSouth Guidelines to Technical Publication TR-TSV-000905. This feature is available only with BellSouth SWA FGD and BellSouth SWA TSBSA 3 when BellSouth SWA CCSAC is specified.

17. Access Transport Parameter (ATP)

This option provides for the transmission of information from the originating calling location through the BellSouth SWA CCSAC network. Information supplied using ATP may consist of one or more of the following: Called Party Sub-Address; Calling Party Sub-Address; High and Low Layer Compatibility and Compatibility checking by the called party's equipment. The specific protocol for ATP is contained in Technical Publication TR-TSV-000962. This feature is available only with BellSouth SWA FGD and BellSouth SWA TSBSA 3 when 64 CCC is specified from suitably equipped offices.

18. Call Screening

This option allows for the BellSouth SWA FGA or BellSouth SWA LSBSA service to utilize the 07 ANI ii Digit and to allow completion of 0+, 0-, N11 (e.g., 411, 611, and 911) calls within the Local Calling Area, and 555-1212 calls. Additionally, calls will not be completed to 1+, 101XXXX, 500, 700, 900, and 976. This feature, available with BellSouth SWA FGA and BellSouth SWA LSBSA, is provided from suitably equipped Company offices.

19. 950-XXXX Dialing Over BellSouth SWA FGD and BellSouth SWA TSBSA 3

This option provides for the origination of traffic over BellSouth SWA FGD and BellSouth SWA TSBSA 3 service utilizing the uniform 950-XXXX access code. The service is available, where technically feasible.

E6. BELLSOUTH SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.3 Basic Service Elements (BellSouth SWA Basic Serving Arrangement Customers Only) (Cont'd)

A. (Cont'd)

1. Hunt Group Arrangement (Multiline Hunt Group Arrangement (MLHG))

This option provides the ability to sequentially access one of two or more line side connections in the originating direction, when the access code of the line group is dialed. **BellSouth SWA** LSBSA services with different methods of providing off-hook supervisory signaling (i.e., provided by customer's equipment vs. forwarded by customer's equipment when the called party answers) cannot be mixed in the same hunt group arrangement. The customer will specify the type of multiline hunt group desired. The types of hunt group arrangements are: Regular Hunt, Preferential Hunt, Circular Hunt with Preferential Hunt, and Circular Hunt with Regular Hunt. This BSE, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices.

The **BellSouth SWA** LSBSA dial tone office utilized for a Hunt Group Arrangement must be the same for all **BellSouth SWA** LSBSA lines in the arrangement. The customer may specify that the **BellSouth SWA** LSBSA lines in the Hunt Group Arrangement be connected to the same customer-designated location for transport to another state or that the lines be connected to multiple customer-designated locations for transport to another state. A split arrangement (two or more customer-designated locations) is available only when the customer-designated locations are served from the same serving wire center. Customer service record information needed to add more than one customer-designated location to the arrangement, or to modify the service arrangement after initial establishment, must be obtained from the HGA **BellSouth SWA** LSBSA customer.

2. Uniform Call Distribution Arrangement (No Generic Name)

This option provides a type of multiline hunting arrangement which provides for an even distribution of calls among the available lines in a hunt group. **BellSouth SWA** LSBSA services with different methods of providing off-hook supervisory signaling (i.e., provided by the customer's equipment vs. forwarded by the customer's equipment when the called party answers) cannot be mixed in the same hunt group arrangement. This BSE, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices.

3. Nonhunting Number for use with Hunt Group or Uniform Call Distribution Arrangement (Multiline Hunt Group Access to Each Port)

This option provides an arrangement for an individual line within a multiline hunt or uniform call distribution group that provides access to that line within the hunt or uniform call distribution group when it is idle or provides busy tone when it is busy, when the nonhunting number is dialed. This BSE, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices.

4. Simplified Message Desk Interface (SMDI) (Message Desk (SMDI))

This option provides call-related information for calls utilizing a **BellSouth SWA** LSBSA multiline hunt group arrangement. SMDI provides the capability for delivering the called directory number, the calling directory number, and a call forwarding indicator (i.e., call forwarding busy, call forwarding don't answer, or direct call). This information is transmitted to the customer's premises utilizing a DNAL provided under the **BellSouth SWA** Transport Sections of this Tariff. In addition, where customer equipment exists, SMDI will allow a customer to activate a message waiting indicator to the called directory number.

The customer shall provide the appropriate customer premise equipment to store, display or print the transmitted call status information as well as equipment to activate or deactivate the message waiting indicator. The Company assumes no liability and will be held harmless for any incompatibility of the customer's equipment to perform satisfactorily with this feature. This BSE, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices on an intraoffice basis. The customer is responsible for providing a modem at customer premises which interfaces BOC equipment at 1200 baud ASCII.

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

FEB 16 1997

PURSUANT TO 807 KAR 5.011,
SECTION 9 (1)

BY: Jordan C. Neal
FOR THE PUBLIC SERVICE COMMISSION

E6. BELLSOUTH SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.3 Basic Service Elements (BellSouth SWA Basic Serving Arrangement Customers Only) (Cont'd)

A. (Cont'd)

5. Surrogate Client Number (SCN) (No Generic Name)

This option allows a customer to purchase one or more telephone numbers that are permanently forwarded to a multiline hunt group over an SMDI line. This capability permits the customer to have a specially assigned telephone number (SCN) for its client. This number appears in the customer's serving central office in order to permit the client's calling telephone number to be transmitted to the customer's premises using SMDI. This BSE, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices. The number associated with SCN is not available for listing purposes.

6. Bulk Calling Line Information Delivery (BCLID) (Calling Directory Number Delivery via BCLID)

This option provides call-related information for calls utilizing a **BellSouth SWA** LSBSA service multiline hunt group arrangement. This information is transmitted over a DNAL provided under the **BellSouth SWA** Transport Sections of this Tariff. Information transmitted includes calling directory number, called directory number, time the call was placed, calling line type (individual or group), and called line status (i.e., busy or idle).

The customer will provide the necessary customer premises equipment to receive, translate, display and/or store the transmitted data. The Company assumes no liability and will be held harmless for any incompatibility of the customer's equipment to perform satisfactorily with this feature. Call detail information is not available on calls originated to the **BellSouth SWA** LSBSA line from outside the LATA unless the office is equipped and interconnected with Signaling System 7 (SS7). BCLID information is only available on calls originating and terminating within SS7 equipped areas. This BSE, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices.

7. Queuing (Multiline Hunt Group UCD With Queuing)

This option provides the capability for the Company's central office to automatically queue calls to a specific multiline hunt group or uniform call distribution arrangement when all hunting group terminals are busy. The calling party will continue to receive ringing indication until the call is completed to the customer's premises. The timing of a call begins upon entrance into a queue. When a line becomes available, the call will be delivered to that line.

The customer may also choose to subscribe to an optional announcement service available with this BSE. This optional customized central office announcement permits audible ringing tone followed by customer-selected announcement(s) which notify the caller of the queue condition. The customer can also specify that the call be connected to a silent termination, audible ringing, or customer provided music.

Call waiting and music after delay announcement services associated with this feature require a DNAL provided under the **BellSouth SWA** Transport Sections of this Tariff. This BSE, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices.

8. User Transfer (Three Way Call Transfer)

This option permits a customer who has established a call using a **BellSouth SWA** LSBSA service to add another party to the call to establish a three-way conference call. Once the three-way conference call has been established, the customer may drop its connection without disconnecting the other two parties and may use its service to make another call. In addition, a customer may hold an in-progress call and complete a second call while maintaining privacy from the first call. User Transfer is available with **BellSouth SWA** LSBSA and by definition utilizes two **BellSouth SWA** LSBSA lines, thereby generating two **BellSouth SWA** LSBSA measurements. This feature, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices.

E6. BELLSOUTH SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.3 Basic Service Elements (BellSouth SWA Basic Serving Arrangement Customers Only) (Cont'd)

A. (Cont'd)

9. Make Busy/Night Transfer (Make Busy Key)

This option provides the ability to create a busy or overflow condition for a multiline hunt group. Make Busy/Night Transfer requires a DNAL provided under the **BellSouth SWA** Transport Sections of this Tariff. By activating a customer-provided key at its premises, the customer can place the group in an "all numbers busy" condition. Subsequent calls may be directed to a central office busy tone, customized central office announcement, or forwarded to an alternate location. Calls forwarded to an alternate location invokes the use of a second **BellSouth SWA** LSBSA line, thereby generating a second **BellSouth SWA** LSBSA measurement. This feature, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices on an intraoffice basis only.

10. Direct Inward Dialing (DID) or DID/Direct Outward Dialing (DOD) Access Service with **BellSouth SWA** LSBSA (Faster Signaling on DID)

This option provides for incoming calls (DID) to customer's premises equipment from the network to reach a specific telephone number without the assistance of an attendant. This feature, available with **BellSouth SWA** LSBSA, is provided from suitably equipped Company offices. DID numbers will be provided in blocks consisting of a minimum of 20 consecutive numbers. DID Access Service is available with standard dial pulse signaling or optionally purchased MF or DTMF signaling and is available on inward only or 2-way **BellSouth SWA** LSBSA lines. This feature is available only as a standalone BSE with **BellSouth SWA** LSBSA and therefore cannot be purchased in conjunction with any other BSE.

11. Automatic Number Identification (ANI)/Charge Number (CN) (Calling Billing Number Delivery)

This option provides the automatic transmission of a three, seven or ten digit number and information digit to the customer's premises for calls originating in the LATA, to identify the geographical calling area (NPA) or calling station ANI will identify the calling station, where possible, or at a minimum, identify the NPA from which the call originated. The three, seven or ten digit numbers will contain the following information: for three digit numbers, NPA only; for seven digit numbers, NXX+XXXX; for ten digit numbers, NPA+NXX+XXXX. With the exception of three digit ANI, the ANI feature is an end office software function which is associated on a call-by-call basis with (1) all individual transmission paths in a trunk group routed directly between an end office and a customer's premises or, where technically feasible, with (2) all individual transmission paths in a trunk group between an end office and an access tandem, and a trunk group between an access tandem and a customer's premises.

Three digit ANI is a software function of the SSP feature which is used in conjunction with **BellSouth SWA 8XX Toll Free Dialing** Ten Digit Screening service and occurs whenever the SSP feature detects an **BellSouth SWA 8XX Toll Free Dialing** Ten Digit Screening service call that does not include the originating caller's ANI.

Three digit ANI, the originating NPA of the 800 call, is available with **BellSouth SWA** TSBSA 3 service routed traffic only. Three digit ANI will be transmitted to the customer on all **BellSouth SWA 8XX Toll Free Dialing** Ten Digit Screening service calls that are processed by the SSP feature for which a complete ANI is not received from the subtending office that originates the 800 call. This includes, but is not limited to: (1) non equal access end offices which have their call recording function performed at a location other than the office which is performing the **BellSouth SWA 8XX Toll Free Dialing** Ten Digit Screening service function, (2) calls from non equal access switches that encounter an ANI failure; and (3) ANI failures from non equal access switches which have their call recording function performed by the office which supports the **BellSouth SWA 8XX Toll Free Dialing** Ten Digit Screening service function.

E6. BellSouth SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.3 Basic Service Elements (BellSouth SWA Basic Serving Arrangement Customers Only) (Cont'd)

A. (Cont'd)

11. (Cont'd)

The seven digit ANI telephone number is available with BellSouth SWA TSBSA 1 and BellSouth SWA TSBSA 2. Technical limitations may exist in Company switching facilities which require ANI to be provided only on a directly trunked basis. ANI will be transmitted on all calls except those originating from multi-party lines, pay telephone lines using BellSouth SWA TSBSA 1 or when an ANI failure has occurred.

The ten digit ANI telephone number is only available with BellSouth SWA TSBSA 3 with multifrequency address signaling. When the BellSouth SWA CCSAC optional feature is specified, the customer may obtain any ANI equivalent by ordering the Charge Number optional feature, as specified following. The ten digit ANI telephone numbers consists of the Numbering Plan Area (NPA) plus the seven digit ANI telephone number. The ten digit ANI telephone number will be transmitted on all calls except those identified as multi-party line or ANI failure, in which case only the NPA will be transmitted (in addition to the information digit described following.)

Generally, the three digit and ten digit ANI telephone number is available with BellSouth SWA TSBSA service, and with BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service that uses BellSouth SWA TSBSA service on a per class of service basis. The ten digit ANI number will be transmitted on calls except those where ANI cannot be provided because the conditions, set forth following exist or, those calls from end offices not equipped to provide ANI. In these instances, only the three digit ANI and the information digits described following, if applicable, will be transmitted. Additionally, when the customer has ordered the 800 to POTS Number Delivery feature, information digits (i.e., 24) which identify the call as an 800 call, will be forwarded to the customer's premises in addition to the ten digit POTS number. These information digits will also replace the information digits which identify the conditions set forth as follows when a POTS number is delivered to the customer's premises.

With BellSouth SWA TSBSA 2, ANI is provided from end offices at which Company recording for end user billing is not provided, or where it is not required, as with BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service. It is not provided from end offices for which the Company needs to forward ANI to its recording equipment.

Where ANI cannot be provided, e.g., on calls from 4 and 8 party services, Information digits will be provided to the customer. (M)

The Information digits identify: (M)

- Telephone number is the station billing number - no special treatment is required, (M)
- Multiparty line - telephone number is a 4 or 8 party line and cannot be identified - number must be obtained via an operator or in some other manner, (M)
- ANI failure has occurred in the end office switch which prevents identification of calling telephone number - must be obtained by operator or in some other manner, (M)
- Hotel/Motel originated call which requires room number identification, (M)
- Coinless station, hospital, inmate, etc., call which requires special screening or handling by the customer, and (M)
- Call is an Automatic Identified Outward Dialed (AIOD) call from customer premises equipment. The ANI telephone number is the listed telephone number of the customer and is not the telephone number of the calling party. (M)

These ANI information digits are available with BellSouth SWA TSBSA. (M)

Charge Number (CN) is an ANI equivalent which provides for the automatic transmission of the ten digit billing number of the calling station number and originating line information. The specific protocol for CN is contained in the BellSouth Guidelines to Technical Publication TR-TSV-000905. This feature is available only with BellSouth SWA TSBSA 3 when BellSouth SWA CCSAC is specified (M)

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

PURSUANT TO 807 KAR 50.11,
SECTION 9 (1)
BY: Stephen D. Bell
SECRETARY OF THE COMMISSION

E6. BellSouth SWA SERVICE

E6.3 Local Switching Optional Features (Cont'd)

E6.3.3 Basic Service Elements (BellSouth SWA Basic Serving Arrangement Customers Only) (Cont'd)

A. (Cont'd)

12. Answer Supervision

This option provides the capability of delivering "on hook/off hook" supervisory signals from a Company end office to a line interface. The signals indicate when the called party has answered an incoming call (went "off hook") or ended a call (gone "on hook"). This feature, available with BellSouth SWA LSBSA, is provided from suitably equipped Company offices and only where non-digital facilities exist.

13. BellSouth® Remote Access Service

BellSouth® Remote Access Service provides one-way ports for the collection, concentration, signaling and aggregation of a customer's dial-up data traffic into a hub site. This option allows the customer's users (end user customer) to call into a remote access server. Connection to BellSouth® Remote Access Service is made by the end user customer dialing a BellSouth® SWA LSBSA local seven or ten-digit number. It is the customer's responsibility to order a sufficient number of BellSouth® SWA LSBSA services in a hunting configuration to carry the BellSouth® Remote Access Service traffic.

Remote access server equipment will be installed in a Company central office. The customer's equipment must support Layer 2 Tunneling Protocol (L2TP).

BellSouth® Remote Access Service is a customer controlled service that supports a dedicated, customer selected remote access server with backup dial-in capability or out-of-band frame relay for network management. The customer may select their remote access server based on the Company's approved equipment list. The customer will be responsible for the management of the remote access server for this service. Customer control indicates that the customer will have full responsibility for initial and ongoing configuration, software release levels and updates, and general code. All software updates must be compatible with associated Company network elements and systems. Monitoring, management, and reporting activities performed by the customer will occur over special access egress circuits into the remote access server or through a backup dial-in channel that the Company will provide for each site.

The Company will not have the ability to remotely access the remote access server for provisioning or management purposes. The Company will only provide remote hands operations support. Remote hands means that the customer identifies the problem and reports the trouble to the Company. The Company will resolve the problem as directed by the customer. Resolution of the problem may include providing hardware, central office switching maintenance, and deployment of human resources necessary to repair hardware failures and restore network service outages.

In addition, the Company will provide a single point of contact (SPOC) for customer service calls regarding provisioning and maintenance to all BellSouth® Remote Access Service customers that order a minimum port quantity of 75,000 ports within the BellSouth region. (N)

The customer will also be responsible for providing the egress circuit(s), as set forth in Sections E7. and E21. following, connecting BellSouth® Remote Access Service to the hub location designated by the customer. These circuits will be required to deliver the BellSouth® Remote Access Service traffic to the customer's designated location. These circuits can be ordered from the Company or other telecommunication providers with the execution of appropriate collocation agreements.

In order to maintain the quality of BellSouth® Remote Access Service, the Company reserves the right to perform preventive maintenance and software updates to the network. This could result in BellSouth® Remote Access Service being unavailable during the time period between 2:00 A.M. and 4:00 A.M. Eastern Time on any given Wednesday or Sunday. The Company only expects to utilize this maintenance window for any given remote access server on the average of once a quarter. However, the Company reserves the right to perform maintenance at any time, at its discretion, that it believes such maintenance is necessary. The Company will make every reasonable effort to provide notice to those customers likely to be affected by such maintenance work.

E6.3.4 Common Switching Optional Features for Use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) (BellSouth SWA FG and BellSouth SWA Basic Serving Arrangement Customers)

A. These Optional Features are available to BellSouth SWA FG and BellSouth SWA Basic Serving Arrangement customers (as specified in the descriptions) at no additional charge.

1. Band Advance Arrangement for use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines)

This option, which is provided in association with two or more WATS Access Line (a.k.a. BellSouth SPA WATS Line) groups, provides for the automatic overflow of terminating calls to a WATS Access Line (a.k.a. BellSouth SPA WATS Line) group, when that group has exceeded its call capacity, to another WATS Access Line (a.k.a. BellSouth SPA WATS Line) group with a band designation equal to or greater than that of the overflowing WATS Access Line (a.k.a. BellSouth SPA WATS Line) group. This arrangement does not provide for call overflow from a group with a higher band

A. (Cont'd)

1. (Cont'd)

SPA WATS Line) group. This arrangement does not provide for call overflow from a group with a higher band designation to one with a lower one. This option is available with BellSouth SWA FGC, BellSouth SWA FGD and BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3. (M)

2. End Office End User Line Service Screening for use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines)

This arrangement provides the ability to verify that an end user has dialed a called party address (by screening the called NPA and/or NXX on the basis of intrastate communications) which is in accordance with that end user's service agreement with the customer, e.g., WATS (a.k.a. BellSouth SPA WATS Line). This arrangement is provided in all Company equal access electronic end offices where technically capable. This arrangement is also provided, where available, to providers of WATS (a.k.a. BellSouth SPA WATS Line) in electromechanical and non-equal access electronic end offices in which WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) are provided. All blocked calls will be routed to announcement recording. It is available with BellSouth SWA FGC, BellSouth SWA FGD and BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3.

The Company will prohibit 101XXXX dialing when requested by the customer.

3. Hunt Group Arrangement for use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines)

This option provides the ability to sequentially access one of two or more WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) (e.g., BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service access lines) in the terminating direction, when the hunting number of the WATS Access Line (a.k.a. BellSouth SPA WATS Line) service group is forwarded from the customer to the Company. This feature is provided in all Company end offices in which WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) are provided. It is available with BellSouth SWA FGC, BellSouth SWA FGD and BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3.

4. Uniform Call Distribution Arrangement for use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines)

This option provides a type of multiline hunting arrangement which provides for an even distribution of terminating calls among the available WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) in the hunt group. Where available, this feature is only provided in Company electronic end offices in which WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) are provided. It is available with BellSouth SWA FGC, BellSouth SWA FGD and BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3.

5. Nonhunting Number for use with Hunt Group Arrangement or Uniform Call Distribution Arrangement for use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines)

This option provides an arrangement for an individual WATS Access Line (a.k.a. BellSouth SPA WATS Line) within a multiline hunt or uniform call distribution group that provides access to that WATS Access Line (a.k.a. BellSouth SPA WATS Line) within the hunt or uniform call distribution group when it is idle or provides busy tone when it is busy, when the nonhunting number is dialed. Where available, this feature is only provided in Company electronic end offices in which WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) are provided. This option is available with BellSouth SWA FGC, BellSouth SWA FGD and BellSouth SWA TSBSA 2 and BellSouth SWA TSBSA 3.

E6.3.5 Basic Service Elements for Use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) (BellSouth SWA Basic Serving Arrangement Customers Only)

A. This BSE is available to BellSouth SWA Basic Serving Arrangement customers only (as specified in the description). As an unbundled BSE its charges are detailed in E6.8.3. For each BSE, the name in parentheses is the service name as listed in the ONA Services User Guide.

1. Direct Inward Dialing (DID) or DID/DOD with BellSouth SWA Basic Serving Arrangements service for Use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) (No Generic Name)

This option provides for incoming (DID) calls to customers' premise equipment from the network to reach a specific telephone number without the assistance of an attendant. This feature, available for use with WATS Access Lines (a.k.a. BellSouth SPA WATS Lines) ordered from Section E7. of this Tariff, is provided from suitably equipped Company offices. DID numbers will be provided in blocks consisting of a minimum of 20 consecutive numbers. This BSE is available with standard dial pulse signaling or optionally purchased MF or DTMF signaling and is available on inward only or 2-way WATS access lines (a.k.a. BellSouth SPA WATS Lines). This feature is available to BellSouth SWA LSBSA and BellSouth SWA TSBSA customers only as a standalone local switching optional feature with WATS access lines (a.k.a. BellSouth SPA WATS Lines) and therefore cannot be purchased in conjunction with any other local switching optional feature.

E6. BELLSOUTH SWA SERVICE

(T)

E6.3 Local Switching Optional Features (Cont'd)

E6.3.6 Switched Transport Termination

A. Rotary Dial Station Signaling

This option provides for the transmission of called party address signaling from rotary dial stations to the customer's premises for originating calls. This option is provided in the form of a specific type of *BellSouth SWA* Transport Termination. It is available with *BellSouth SWA FGB* or *BellSouth SWA* TSBSA 1 only on a directly trunked basis.

(T)

B. Operator Trunk - Coin, Non-Coin or Combined Coin and Non-Coin

This option may be ordered to provide coin, non-coin, or combined coin and non-coin operation. It is available only with *BellSouth SWA FGC*, *BellSouth SWA FGD* and *BellSouth SWA* TSBSA 2 and *BellSouth SWA* TSBSA 3 and is provided in electronic end offices and other Company end offices where equipment is available. It is provided as a trunk type of *BellSouth SWA* Transport Termination.

(T)

Coin

This arrangement provides for initial coin return control and routing of 0+, 0-, 1+, 01+ or 011+ prefixed originating coin calls requiring operator assistance to the customer's premises. Because operator assisted coin calling traffic is routed over a trunk group dedicated to operator assisted calls, this arrangement is only provided in association with the Service Class Routing option.

The operator assistance coin calling arrangement is also normally ordered by the customer in conjunction with the ANI optional feature or BSE, since the preponderance of trunk groups equipped with this arrangement will be terminated in the customer's operator services systems, rather than in the customer's manual cord boards.

B. Operator Trunk - Coin, Non-Coin or Combined Coin and Non-Coin (Cont'd)

Non-Coin

This arrangement provides for the routing of 0+, 0-, 1+, 01+ or 011+ prefixed originating non-coin calls requiring operator assistance to the customer's premises. Because operator assisted non-coin calling traffic is routed over a trunk group dedicated to operator assisted calls, this arrangement is only provided in association with the Service Class Routing option.

The operator assistance non-coin calling arrangement is also normally ordered by the customer in conjunction with the ANI optional feature or BSE, since the preponderance of trunk groups equipped with this arrangement will be terminated in the customer's operator services systems, rather than in the customer's manual cord boards. When so equipped, the ANI optional feature or BSE provides for the forwarding of information digits which identify that the call has originated from a hotel or motel, and whether room number identification is required, or that special screening is required, e.g., for coinless public stations, dormitory or inmate stations, or other screening arrangements agreed to between the customer and the Company.

Combined Coin and Non-Coin

This arrangement provides for initial coin return control and routing of 0+, 0-, 1+, 01+ or 011+ prefixed originating operator assisted coin and non-coin calls requiring operator assistance to the customers premises. Because operator assisted coin and non-coin calling traffic is routed over a trunk group dedicated to operator assisted calls, this arrangement is only provided in association with the Service Class Routing option.

This arrangement is normally ordered by the customer in conjunction with the ANI optional feature or BSE, since the preponderance of trunk groups equipped with this arrangement will be terminated in the customer's operator services systems, rather than in the customer's manual cord boards. When so equipped, the ANI optional feature or BSE provides for the forwarding of information digits which identify that the call has originated from a hotel or motel, and whether room number identification is required, or that special screening is required, e.g., for coinless public stations, dormitory or inmate stations, or other screening arrangements agreed to between the customer and the Company.

C. Operator Trunk - Full Feature

This option provides the operator functions available in the end office to the customer's operator. These functions are: (1) Operator Released, (2) Operator Attached, (3) Coin Collect, (4) Coin Return, and (5) Ringback. It is available with **BellSouth SWA FGD** and **BellSouth SWA** TSBSA 3 and is provided as a trunk type of **BellSouth SWA** Transport termination. This option is not available with the **BellSouth SWA** CCSAC option. This arrangement is only available with the Service Class Routing option.

E6. BellSouth SWA SERVICE

E6.4 Transmission Specifications

Each BellSouth SWA service transmission path is provided with standard transmission specifications. There are three different standard specifications (Types A, B and C). The standard for a particular transmission path is dependent on the BellSouth SWA FG or BellSouth SWA Basic Serving Arrangement, the Interface Group Arrangement and whether the service is directly routed or via an access tandem. When directly routed service is equipped with the tandem signaling option, Type A transmission specifications will be the standard. The available transmission specifications are set forth in E6.4.1 following. Data Transmission Parameters are also provided with each BellSouth SWA service transmission path and WATS Access Line (a.k.a. BellSouth SPA WATS Line). The Company will, upon notification by the customer that the parameters set forth in E6.4.2.A. or E6.4.2.B. are not being met, conduct tests independently or cooperatively with the customer, and take any necessary action to insure that the parameters are met.

The Company will maintain existing transmission specifications on functioning service configurations installed prior to the effective date of this Tariff except that service configurations having performance specifications exceeding the standards listed in this provision will be maintained at performance levels specified in this Tariff.

The transmission specifications contained in this Section are immediate action limits. Acceptance limits are set forth in Technical Reference PUB TR-NPL-000334. This Technical Reference also provides the basis for determining BellSouth SWA FG service maintenance limits. Transmission specifications for *CCS7 Signaling Connections and CCS7 Signaling Terminations* are set forth in the BellSouth Guidelines to Technical Publication TR-TSV-000905. Transmission Specifications for 64 CCC are set forth in the Technical Publication TR-TSV-000962.

E6.4.1 Standard Transmission Specifications

Following are descriptions of the three Standard Transmission specifications available with BellSouth SWA FG service and BellSouth SWA Basic Serving Arrangements. The specific applications in terms of the BellSouth SWA FG and BellSouth SWA Basic Serving Arrangements and Interface Group Arrangements with which the BellSouth SWA FG and BellSouth SWA Basic Serving Arrangements standard transmission specifications are provided are set forth in E6.2.1.C., E6.2.2.C., E6.2.3.C., E6.2.4.C., E6.2.8.C., E6.2.9.A.3, E6.2.9.B.3. and E6.2.9.C.3. preceding.

A. Type A Transmission Specifications

Type A Transmission Specifications are provided with the following parameters:

1. Loss Deviation

The maximum Loss Deviation of the 1004 Hz loss relative to the Expected Measured Loss (EML) is +/- 2.0 dB.

2. Attenuation Distortion

The maximum Attenuation Distortion in the 404 to 2804 Hz frequency band relative to the loss at 1004 Hz is -1.0 dB to +3.0 dB.

3. C-Message Noise

The maximum C-Message Noise for the transmission path at the route miles listed is less than or equal to:

Route Miles	C-Message Noise
less than 50	32dBmCO
51 to 100	34 dBmCO
101 to 200	37 dBmCO
201 to 400	40 dBmCO
401 to 1000	42 dBmCO

A. Type A Transmission Specifications (Cont'd)

4. C-Notch Noise

The maximum C-Notch Noise, utilizing a -16 dBmO holding tone, is less than or equal to 45 dBmCO.

5. Echo Control

Echo Control, identified as Equal Level Echo Path Loss, and expressed as Echo Return Loss and Singing Return Loss, is dependent on the routing, i.e., whether the service is routed directly from the customer's point of termination (POT) to the end office or via an access tandem. It is equal to or greater than the following:

Routing Configuration	Echo Return Loss	Singing Return Loss
POT to Access Tandem	21 dB	14 dB
POT to End Office		
- Direct	N/A	N/A
- Via Access Tandem	16 dB	11 dB
- Direct equipped with Tandem Signaling	16 dB	11 dB

B. Type B Transmission Specifications

Type B Transmission Specifications are provided with the following parameters:

1. Loss Deviation

The maximum Loss Deviation of the 1004 Hz loss relative to the Expected Measured Loss (EML) is +/- 2.5 dB.

2. Attenuation Distortion

The maximum Attenuation Distortion in the 404 to 2804 Hz frequency band relative to loss at 1004 Hz is -2.0 dB to +4.0 dB.

3. C-Message Noise¹

The maximum C-Message Noise for the transmission path at the route miles listed is less than or equal to:

Route Miles	C-Message Noise ¹	
	Type B1	Type B2
less than 50	32 dBmCO	38 dBmCO
51 to 100	33 dBmCO	39 dBmCO
101 to 200	35 dBmCO	41 dBmCO
201 to 400	37 dBmCO	43 dBmCO
401 to 1000	39 dBmCO	45 dBmCO

Note 1: For *BellSouth SWA FGC*, *BellSouth SWA FGD*, *BellSouth SWA TSBSA 2* and *BellSouth SWA TSBSA 3*, only Type B2 will be provided. For *BellSouth SWA FGA*, *BellSouth SWA FGB*, *BellSouth SWA LSBSA* and *BellSouth SWA TSBSA 1*, Type B1 or B2 will be provided as set forth in Technical Reference TR-NPL-000334.

C. Type C Transmission Specifications

Type C Transmission Specifications are provided with the following parameters:

1. Loss Deviation

The maximum Loss Deviation of the 1004 Hz loss relative to the Expected Measured Loss (EML) is +/- 3.0 dB.

2. Attenuation Distortion

The maximum Attenuation Distortion in the 404 to 2804 Hz frequency band relative to loss at 1004 Hz is -2.0 dB to +5.5 dB.

E6.4 Transmission Specifications (Cont'd)

E6.4.1 Standard Transmission Specifications (Cont'd)

C. Type C Transmission Specifications (Cont'd)

3. C-Message Noise

The maximum C-Message Noise for the transmission path at the route miles listed is less than or equal to:

Route Miles	C-Message Noise ¹	
	Type C1	Type C2
less than 50	32 dBmCO	38 dBmCO
51 to 100	33 dBmCO	39 dBmCO
101 to 200	35 dBmCO	41 dBmCO
201 to 400	37 dBmCO	43 dBmCO
401 to 1000	39 dBmCO	45 dBmCO

4. C-Notch Noise

The maximum C-Notch Noise, utilizing a -16 dBmO holding tone is less than or equal to 47 dBmCO.

5. Echo Control

Echo Control, identified as Return Loss and expressed as Echo Return Loss and Singing Return Loss, is equal to or greater than the following:

Routing Configuration	Echo Return Loss	Singing Return Loss
POT to End Office		
- Direct	13 dB	6 dB

Note 1: For *BellSouth SWA FGC*, *BellSouth SWA FGD*, *BellSouth SWA TSBSA 2* and *BellSouth SWA TSBSA 3*, only Type C2 will be provided. For *BellSouth SWA FGA*, *BellSouth SWA FGB*, *BellSouth SWA LSBSA* and *BellSouth SWA TSBSA 1*, Type C1 or C2 will be provided as set forth in Technical Reference TR-NPL-000334.

(T)

E6.4 Transmission Specifications (Cont'd)

E6.4.2 Data Transmission Parameters

Two types of Data Transmission Parameters, i.e., Type DA and Type DB, are provided for **BellSouth SWA** service arrangements. The specific applications in terms of service arrangements with which they are provided are set forth in E6.2.1.C., E6.2.2.C., E6.2.3.C., E6.2.4.C., E6.2.8.C., E6.2.9.A.3, E6.2.9.B.3. and E6.2.9.C.3. preceding. Following are descriptions of each.

(T)

A. Data Transmission Parameters - Type DA

1. Signal to C-Notched Noise Ratio

The Signal to C-Notched Noise Ratio is equal to or greater than 33 dB.

2. Envelope Delay Distortion

The maximum Envelope Delay Distortion for the frequency bands and route miles specified is:

604 to 2804 Hz

less than 50 route miles

500 microseconds

equal to or greater than 50 route miles

900 microseconds

1004 to 2404 Hz

less than 50 route miles

200 microseconds

equal to or greater than 50 route miles

400 microseconds

3. Impulse Noise Counts

The Impulse Noise Counts exceeding a 65 dBmCO threshold in 15 minutes is no more than 15 counts.

4. Intermodulation Distortion

The Second Order (R2) and Third Order (R3) Intermodulation Distortion products are equal to or greater than:

Second Order (R2) 33 dB

Third Order (R3) 37 dB

5. Phase Jitter

The Phase Jitter over the 4 to 300 Hz frequency band is less than or equal to 5 degrees peak-to-peak.

6. Frequency Shift

The maximum Frequency Shift does not exceed -2 to +2 Hz.

B. Data Transmission Parameters - Type DB

1. Signal to C-Notched Noise Ratio

The signal to C-Notched Noise Ratio is equal to or greater than 30 dB.

2. Envelope Delay Distortion

The maximum Envelope Delay Distortion for the frequency bands and route miles specified is:

604 to 2804 Hz

less than 50 route miles

800 microseconds

equal to or greater than 50 route miles

1000 microseconds

E6. BELLSOUTH SWA SERVICE

(T)

E6.5 Obligations Of The Company

In addition to the obligations of the Company set forth in Section E2. preceding, the Company has certain other obligations pertaining only to the provision of *BellSouth SWA* service. These obligations are as follows:

(T)

E6.5.1 Network Management

The Company will administer its network to insure the provision of acceptable service levels to all telecommunications users of the Company's network services. Generally, service levels are considered acceptable only when both end users and customers are able to establish connections with little or no delay encountered within the Company network. The Company maintains the right to apply protective controls, i.e., those actions, such as call gapping, which selectively cancel the completion of traffic, over any traffic carried over its network, including that associated with a customer's *BellSouth SWA* service. Generally, such protective measures would only be taken as a result of occurrences such as failure or overload of Company or customer facilities, natural disasters, mass calling or national security demands. In the event that the protective controls applied by the Company result in the complete loss of service by the customer, the customer will be granted a Credit Allowance for Service Interruption as set forth in E2.4.4.B.3. preceding.

(T)

E6.5.2 Design And Traffic Routing Of BellSouth SWA Service

The customer line or trunk directionality and/or traffic routing of the *BellSouth SWA* service between the customer's premises and the entry switch are specified on the customer's order for service. The Company will work cooperatively with the customer in determining (1) whether the service is to be routed directly to an end office or through an access tandem switch, and (2) the directionality of the service before establishing a firm order. Additionally, for *BellSouth SWA FGB* and *BellSouth SWA* TSBSA 1 the customer may order the optional feature Customer Specification of *BellSouth SWA* Transport Termination.

(T)

(T)

E6.5.3 Provision Of Service Performance Data

Subject to availability, end-to-end service performance data available to the Company through its own service evaluation routines, may also be made available to the customer based on previously arranged intervals and format. These data provide information on overall end-to-end call completion and non-completion performance, e.g., customer equipment blockage, failure results and transmission performance. These data do not include service performance data which are provided under other tariff sections, e.g., testing service results. If data are to be provided in other than paper format, the charges for such exchange will be determined on an individual case basis.

E6.5.4 Trunk Group Measurements Reports

Subject to availability, the Company will make available trunk group data in the form of usage in CCS, peg count and overflow, to the customer based on previously agreed to intervals.

PUBLIC SERVICE COMMISSION

EFFECTIVE

FEB 16 1997

PURSUANT TO 807 KAR 5.011,
SECTION 9 (1)

BY: Jordan C. Neal
FOR THE PUBLIC SERVICE COMMISSION

E6. BellSouth SWA SERVICE

E6.5 Obligations Of The Company (Cont'd)

E6.5.5 Determination of Number Of Transmission Paths

The following applies to BellSouth SWA voice transmission paths, and does not apply to signaling connections provided with the BellSouth SWA CCSAC option. The number of transmission paths for *CCS7 Signaling Connections and CCS7 Signaling Terminations* will be determined jointly by the Company and the customer. (C)

The customer's order for BellSouth SWA FGA, BellSouth SWA FGC, BellSouth SWA FGD and BellSouth SWA LSBSA, which are ordered on a per line basis, and BellSouth SWA TSBSA 1, BellSouth SWA TSBSA 2 or BellSouth SWA TSBSA 3 or per trunk basis respectively, or the BellSouth SWA Transport facilities determines the number of transmission paths for BellSouth SWA service. A transmission path is a communication path within the frequency bandwidth of approximately 300 to 3000 Hz or a derived communication path of a frequency bandwidth of approximately 300 Hz to 3000 Hz provided over a high frequency analog facility or high speed digital facility between a customer's premises and a Company location.

E6.5.6 Determination of Number of End Office Transport Terminations

For analog entry switches, a termination may be provided for each transmission path provided. For digital entry switches, an equivalent termination may be provided for each transmission path provided.

E6.5.7 Design Blocking Probability

- A. The Company will design and monitor the trunk groups used in the provision of BellSouth SWA service to meet the blocking probability criteria as set forth in 1. through 4. following.
1. For BellSouth SWA FGA, and BellSouth SWA LSBSA no design blocking criteria apply.
 2. For BellSouth SWA FGB and BellSouth SWA FGC and BellSouth SWA TSBSA 1 and BellSouth SWA TSBSA 2 the design blocking objective will be no greater than one percent (.01) between the point of termination at the customer's premises and the first point of switching. Standard traffic engineering methods will be used by the Company to determine the number of transmission paths required to achieve this level of blocking.
 3. For BellSouth SWA FGD and BellSouth SWA TSBSA 3, the design blocking objective will be no greater than one percent (.01) between the point of termination at the customer's premises and the end office switch, whether the traffic is directly routed without an alternate route or when routed via an access tandem. Standard traffic engineering methods as set forth in reference document Technical Reference SR EOP-000191 Trunk Traffic Engineering Concepts and Applications will be used by the Company to determine the number of transmission paths required to achieve this level of blocking.
 4. The design blocking criteria for BellSouth SWA 500 service, BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service or BellSouth SWA 900 service provided from an end office not equipped with equal access capabilities will be equivalent to that set forth preceding for BellSouth SWA FGC and BellSouth SWA TSBSA 2, except when more than one tandem is employed in the transport of an BellSouth SWA 500 service, BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service or BellSouth SWA 900 service call. The design blocking criteria for BellSouth SWA 500 service, BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service or BellSouth SWA 900 service provided from an end office equipped with equal access capabilities will be equivalent to that set forth preceding for BellSouth SWA FGD and BellSouth SWA TSBSA 3, except when more than one tandem is employed in the transport of a BellSouth SWA 500 service, BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service or BellSouth SWA 900 service call. In the event of a BellSouth SWA 900 service media stimulated call, the design blocking objective of no greater than one percent (.01) will not be guaranteed.

E6.5 Obligations Of The Company (Cont'd)

E6.5.7 Design Blocking Probability (Cont'd)

A. (Cont'd)

5. The Company will perform routine measurement functions for trunk capacity ordered in accordance with the Company design blocking criteria to assure that an adequate number of transmission paths are in service. The Company will recommend that additional capacity (i.e., trunks) be ordered by the customer when additional paths are required to reduce the measured blocking to the design blocking level. Where design blocking criteria apply, the design blocking objective is assumed to have been met if the routine measurements show that the measured blocking does not exceed the threshold listed in the following tables.

E6. BELLSOUTH SWA SERVICE

E6.6 Obligations Of The Customer

In addition to the obligations of the customer set forth in Section E2. preceding, the customer has certain specific obligations pertaining to the use of *BellSouth SWA* service. These obligations are as follows:

E6.6.1 Report Requirements

A. Customers are responsible for providing the following reports to the Company, when applicable.

1. Jurisdictional Reports

When a customer orders *BellSouth SWA* service for both interstate and intrastate use, the customer is responsible for providing reports as set forth in E2.3.14 preceding. Charges will be apportioned in accordance with those reports. The method to be used for determining the intrastate charges is set forth in E2.3.15 preceding.

2. Code Screening Reports

When a customer orders service class routing, trunk access limitation or call gapping arrangements, it must report the number of trunks and/or appropriate codes to be instituted in each end office or access tandem switch, for each of the arrangements ordered.

3. 500/900 NXX Code Testing

When ordering *BellSouth SWA* 500 or *BellSouth SWA* 900 service, the customer will reserve and assign within their network the 500/900 NXX-4141 as an access test number(s). The Company will use this number to verify that *BellSouth SWA* 500/*BellSouth SWA* 900 service is being provided to the customer's network when the customer's 500/900 NXX is activated in the Company's network.

4. 500/900 NXX Code Trouble Reporting

When ordering *BellSouth SWA* 500 or *BellSouth SWA* 900 service, the customer will reserve and assign within their network the 500/900 NXX-0000 as a trouble reporting number(s). The Company will use this number(s) to assure the customer that originating *BellSouth SWA* 500/*BellSouth SWA* 900 service trouble reports are being reported to their trouble reporting centers.

E6.6.2 Supervisory Signaling

The customer's facilities shall provide the necessary on-hook, off-hook, answer and disconnect supervision.

E6.6.3 Trunk Group Measurements Reports

With the agreement of the customer, trunk group data in the form of usage in CCS, peg count and overflow for its end of all access trunk groups, where technologically feasible, will be made available to the Company. These data will be used to monitor trunk group utilization and service performance and will be based on previously arranged intervals and format.

E6.6.4 Design of BellSouth SWA Services

When a customer orders *BellSouth SWA* service, it is the customer's responsibility to assure that sufficient access service facility quantities have been ordered to handle its traffic.

E6.6.5 Billing Data For Terminating Usage

When a customer uses the service(s) of an alternative access provider or alternative tandem service provider and as a result the Company is unable to record usage terminated via dedicated trunks with sufficient specificity to identify the access customer of record, the alternative access provider or alternative tandem service provider must provide the Company with billing data so the Company can properly measure and bill the access minutes. The record that will be used for the transmission of data is the 110120 record. A description of the record and the fields contained can be found in BellCore Publication SR-ST5-000320, Message Interface. It is the responsibility of the alternative access provider or alternative tandem service provider to provide the billing data information to the Company on a daily basis.

Failure on the part of the alternative provider to comply with the requirements of this paragraph will result in the Company's billing the alternative provider all terminating access minutes.

(T)

E6.7 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for *BellSouth SWA* service.

(T)

E6.7.1 Description And Application Of Rates And Charges

There are three types of rates and charges that apply to *BellSouth SWA* service. These are monthly recurring rates, usage rates and nonrecurring charges. These rates and charges are applied differently to the various rate elements as set forth in D. following.

SECTION 9 (1)

BY: Jordan C. Neal
FOR THE PUBLIC SERVICE COMMISSION

E6. BellSouth SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

A. Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided. Elements having a monthly "per mile" charge are charged per mile, per month. For the Switched DNAL, the applicable mileage band rate will be applied per mile, per month. For billing purposes, each month is considered to have thirty days.

B. Usage Rates

Usage rates are rates that apply only when a specific rate element is used. These are applied on a per access minute basis or on a per call basis. BellSouth SWA Common Transport transmission rates will be applied on a per mile, per minute of use basis. Usage Rate charges are accumulated over a monthly period.

1. BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening Service

A per call charge as specified in E6.8.4 following applies for each 800 call utilizing BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service for which an BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service Customer is identified.

2. BellSouth SWA 500 Service

A per call charge, as specified in E6.8.13 following, applies for each 500 call.

3. BellSouth CCS7 Access Arrangement Usage

a. An Integrated Switched Digital Network User Part (ISUP) usage charge per signaling message applies as specified in E6.8.1 following. (N)

b. A TCAP usage charge per signaling message applies as specified in E6.8.1 following. (N)

C. Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation of new service or change to an existing service). The types of nonrecurring charges that apply for BellSouth SWA service are: installation of new service, installation of optional features and BSEs, service arrangements, transfer of service, BellSouth SWA 500, BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening, and BellSouth SWA 900 services.

The following list identifies the individual BellSouth SWA service elements, for which charges are set forth in Section E6. of this Tariff, which are eligible for credit of nonrecurring charges under "Service Installation Guarantee" found in E2.4.10 of this Tariff. Customers with these services are not eligible for the Service Installation Guarantee when the requested installation, move or rearrangement service order interval is four days or less as measured from the Application Date of the order. (T)

Switched Local Channels

BellSouth SWA Transport (Interoffice channel) Installation

Optional Features (Installed coincident with Switched Local Channels, Switched Interoffice Channels and associated Channelization equipment,) and

Dedicated Network Access Line Service

The following list identifies the BellSouth SWA Service elements not eligible for credit of nonrecurring charges under "Service Installation Guarantee" found in E2.4.10 of this Tariff. (T)

BellSouth SWA Service Rearrangements, Conversions, and/or Inside Moves,

Activation of BellSouth SWA 900 Service codes,

BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening Service

BellSouth SWA 500 Service

E6. BellSouth SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

C. Nonrecurring Charges (Cont'd)

Customers will be exempt from nonrecurring charges for the installation of new BellSouth SWA transport facilities and optional features associated with those facilities, as set forth in E6.8.1 following, prompted by BellSouth SWA Transport Restructure, pursuant to the provisions set forth in C.3, following, during the time periods established therein. (M)

The exemption is applicable to the installation of facilities in connection with those rearrangements of existing BellSouth SWA services which qualify for the waiver of service rearrangement nonrecurring charges for roll-overs and grooming, as set forth in E6.7.1.C.3. (M)

Customers will be exempt from nonrecurring charges for the installation of new BellSouth SWA Transport facilities and optional features associated with those facilities, as set forth in E6.8.1 following, prompted by BellSouth SWA Transport Restructure, until September 30, 1994, as set forth in E6.7.1.C.3.

Additionally, customers will be allowed to optimize their Switched Access Dedicated End Office and Tandem routed trunks without payment of installation charges (tariff sections E6.8.1 (B), (F) and (H) (8)) as follows. The waiver of nonrecurring charges is applicable to all Switched trunks, interoffice channels and channelization over which those trunks are provided, not to exceed the total number in service in a given LATA at the beginning of the waiver period. Beginning January 2, 1999, this waiver is available to customers submitting an Access Service Request (ASR) for the rate elements listed above meeting this criteria no later than 5:00 pm (EST) on April 30, 1999. All ASRs will be handled as special projects with negotiated due dates. the waiver of nonrecurring installation charges will be implemented through the application of a credit to the customer's bill.

The exemption is applicable to the installation of facilities in connection with those rearrangements of existing BellSouth SWA services which qualify for the waiver of service rearrangement nonrecurring charges for roll-overs and grooming, as set forth in E6.7.1.C.3.

1. Installation of New Service

Nonrecurring charges apply to each BellSouth SWA service installed. For BellSouth SWA FGA, BellSouth SWA FGB, BellSouth SWA LSB SA and BellSouth SWA TSB SA 1 which are ordered on a per line or trunk basis respectively, and for BellSouth SWA FGD and BellSouth SWA TSB SA 3 when ordered on a per trunk basis, the charge is applied per line or trunk. In addition, when a CCS7 Signaling Connection is installed, the charge is applied per signaling connection. (T)

E6. BELLSOUTH SWA SERVICE

(T)

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

C. Nonrecurring Charges (Cont'd)

1. Installation of New Service (Cont'd)

a. Switched Local Channel

Nonrecurring charges, as set forth in E6.8.1. following, apply to each **BellSouth SWA** service installed. When one Switched Local Channel is ordered and installed, it is billed at the First Service installed rate. When more than one Switched Local Channel of the same type is ordered and installed at the same locations, for the same customer, at the same time, the first Switched Local Channel is billed at the "First Service" installed charge and the other Switched Local Channels are billed at the "Additional Service" installed charges. Services requested on multiple ASRs will be treated as one request when requirements, as specified in E6.1.7 are met, and will receive "First" and "Additional" treatment.

(T)

b. BellSouth SWA Dedicated Transport

The nonrecurring charge for the **BellSouth SWA** Dedicated Interoffice Transport, as set forth in E6.8.1 following, will be applied each time **BellSouth SWA** Dedicated Interoffice Transport is ordered by the customer.

(T)

(T)

c. BellSouth SWA Common Transport

The installation charge, as set forth in E6.8.1 following, for **BellSouth SWA** Common Transport is applicable on a first and additional line or trunk basis. If a customer places an Access Service Request (ASR) for multiple lines to the same end office for multiple trunks on a common Trunk group with the same premises interface code, the first line or trunk on the ASR is assessed the "First" installation charge and each additional line or trunk is assessed the "Additional" installation charge. Services requested on multiple ASRs will be treated as one request when requirements, as specified in E6.1.7 are met, and will receive "First" and "Additional" treatment.

(T)

(T)

2. Installation of Optional Features

If a separate nonrecurring charge applies for the installation of an optional feature or BSE available with **BellSouth SWA** service, the charge applies whether the feature or BSE is installed coincident with the initial installation of service or at any time subsequent to the initial installation of service.

(T)

3. Service Rearrangements

Service rearrangements are changes to existing services which do not result in either a change in the minimum period requirements as set forth in E5.2.6 preceding or a change in the physical location of the point of termination at the customer's premises or the customer's end user's premises. Changes which result in the establishment of new minimum period obligations are treated as discontinuance of service and establishment of new service. Charges in the physical location of the point of termination are treated as moves and are described and charged for as set forth in E6.7.7 following.

E6. BELLSOUTH SWA SERVICE

(T)

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

C. Nonrecurring Charges (Cont'd)

3. Service Rearrangements (Cont'd)

A change which results from a transfer of service, as set forth in E2.1.2 preceding, is described in 4. following and charged as set forth in E6.8.12 following.

Nonrecurring charges for service rearrangements apply to those additions, changes or rearrangements (excluding disconnection of optional features and BSEs) made subsequent to the installation of new service.

The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves an actual physical change to the service. When actual physical work is required to rearrange the service, the charge to the customer is dependent upon where the work is performed to accomplish the requested change. The applicable charges for service rearrangements are charged on a transmission path, end office and/or end office and tandem level as specified in E6.8 following.

Administrative changes, as identified following, will be made without charge(s) to the customer. Such changes require the continued provision and billing of the Access Service to the same entity (i.e., customer remains responsible for all outstanding indebtedness for the Access Service). Administrative changes are as follows:

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes its name--e.g., AT&T Long Lines to AT&T Communications)
- Change of customer or customer's end user premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number. The customer of record does not change.)
- Change of agency authorization,

E6. BellSouth SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

C. Nonrecurring Charges (Cont'd)

3. Service Rearrangements (Cont'd)

- Change of customer circuit identification,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number,
- Change of jurisdiction.

All other service rearrangements will be charged for as follows:

- If the change involves the addition of an optional feature or BSE which has a separate nonrecurring charge, that nonrecurring charge will apply. (The addition of Local Switching Optional Features or BSEs during conversion from BellSouth SWA FG service to BellSouth SWA LSBSA or BellSouth SWA TSBSA service will also incur the applicable nonrecurring charges.)
- With the exception of BellSouth SWA FGD services converted from Multifrequency (MF) to BellSouth SWA CCSAC, if the change involves rearrangement of a customer's existing lines and/or trunk groups, a modification to a WATS Access Line (a.k.a. BellSouth SPA WATS Line), the addition and/or modification of an optional feature or BSE which does not have a separate nonrecurring charge, rearrangements that are accomplished via software translations changes such as those made in the common block of the switch (e.g., adding and/or changing carrier codes) and/or dialing arrangement changes to BellSouth SWA 500 or BellSouth SWA 900 service, *and/or adding point codes associated with BellSouth CCS7 Access Arrangement Service*, nonrecurring charges for service rearrangements will apply. A common charge is assessed for all changes submitted on the same ASR. Service requested on multiple ASRs will be treated as one request when requirements, as specified in E6.1.7, are met. The nonrecurring charges for service rearrangements are as specified in E6.8.11 following.
- If the change involves rearrangement of a customer's existing BellSouth SWA FGD or BellSouth SWA TSBSA 3 service from direct routed to access tandem routed trunks, no charge shall apply for the customer requested rearrangement as long as the following conditions are met:
 - Access tandem routed access was not available to the end office at the time the end office was converted to an equal access office,
 - the customer was providing service in the access tandem serving area prior to the availability of access tandem routed access, and
 - the customer requests the rearrangement of its trunks from direct routed access to access tandem routed access within six months of the first availability of access tandem routed access in that area.
- If the change involves changing the Network Channel Interface (NCI) code associated with each BellSouth SWA service provisioned as "Shared Use Facilities" on a DS1 Special Access High Capacity (a.k.a. BellSouth SPA DS1) service being converted or rolled over to a DS3 Special Access High Capacity (a.k.a. BellSouth SPA DS3) service, then a separate nonrecurring charge will apply for each BellSouth SWA circuit effected as specified in E6.8.9 following.

PUBLIC SERVICE COMMISSION

SECRETARY OF THE COMMISSION

E6. BellSouth SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

C. Nonrecurring Charges (Cont'd)

3. Service Rearrangements (Cont'd)

When an optional feature or BSE is not required on each transmission path, but rather for an entire transmission path group, and end office or an access tandem switch, only one such charge will apply (i.e., it will not apply per transmission path). For example, if the requested option or change is common to more than one trunk, and the work required will be performed in the common block of the switch, the charge specified in E6.8.11.D. following will be multiplied by the total number of Company central offices (access tandem and end offices involved).

When the BellSouth SWA CCSAC option is elected, the customer may add Calling Party Number (CPN), Charge Number (CN) and Carrier Selection Parameter (CSP) at no additional charge if these features are specified at the time the BellSouth SWA CCSAC option is ordered for existing BellSouth SWA trunks.

When a customer requests the establishment or change of point code associated with BellSouth CCS7 Access Arrangement, then a separate nonrecurring charge will apply for each point code as specified in E6.8.1. (N)

When the 64 CCC option is elected to upgrade an existing BellSouth SWA FGD and BellSouth SWA TSBSA 3 trunk equipped with BellSouth SWA CCSAC, the rearrangement charge as specified in E6.8.11.F. shall apply.

When the 64 CCC option is elected, the customer may select Access Transport Parameter (ATP) option at no additional charge if this feature is specified at the time the 64 CCC option is ordered for existing BellSouth SWA trunks.

If the change involves the conversion, or rollover, of BellSouth SWA DS1 High Capacity service to BellSouth SWA DS3 High Capacity service, made at the customer's request, then a separate nonrecurring charge(s), as appropriate will apply to update the Network Channel Interface (NCI) code associated with each BellSouth SWA VG and/or other sub-BellSouth SWA DS1 level circuit riding the channelized BellSouth SWA DS1 High Capacity service(s) being rolled over. This charge will apply only where NCI code updates are requested by the customer. Payment of the nonrecurring charge(s) will be the responsibility of the customer who leases the channelized BellSouth SWA DS1 High Capacity service(s) being rolled over.

If the change involves the addition of BellSouth® Remote Access Service ports, nonrecurring charges as set forth in E6.8.3.E.13, following will apply for the installation of the additional ports as well as appropriate BellSouth SWA LSBSA installation nonrecurring charges.

For all other changes, including the addition of optional features without separate nonrecurring charges, the Service Rearrangement charge, in E6.8.8 following, will apply.

If, due to technical limitations of the Company, a customer could not combine its BellSouth SWA Toll Free Dialing Ten Digit Screening service traffic with its BellSouth SWA FGD or BellSouth SWA TSBSA 3 service traffic, no charge shall apply to combine these trunk groups when it becomes technically possible.

Customers will be exempt from nonrecurring charges for Service Rearrangements, prompted by BellSouth SWA Transport Restructure until December 31, 1994, for replacement of access tandem routed trunks with direct end office routed trunks or for replacement of direct end office routed trunks with access tandem routed trunks and to roll-overs and grooming of existing BellSouth SWA services, but shall not include BellSouth SWA services which ride special access services. In addition the waiver is limited to one change for a given BellSouth SWA trunk, trunk group or facility during the waiver period. In order for nonrecurring charges for Service Rearrangements to be waived, all Access Service Requests (ASRs) must be placed by December 31, 1994 with due dates of no later than December 31, 1995, and the customer must maintain the same point of presence (POP) location. Additionally, the following conditions must be met to receive an exemption:

For access tandem to direct and direct to access tandem trunk rearrangements, the following additional requirements must be met:

- It is the responsibility of the customer to provide all related purchase order numbers pertaining to the connect ASR on the disconnect ASR.

3. Service Rearrangements (Cont'd)

- The connect ASR and the disconnect ASR must be placed at the same time.
- If the number of installed trunks exceed the number of trunks to be disconnected, the customer must provide, at the time the ASRs are placed, justification based upon standard engineering methods.

For service rearrangements other than access tandem to direct and direct to access tandem trunk rearrangements, the following additional requirements must be met:

- When multiple ASRs are required, the ASRs must be submitted at the same time and the customer must provide related purchase order numbers pertaining to the multiple ASRs.

Notwithstanding the provision of E6.7.1.C.3. preceding, if a customer has submitted to the Company by December 31, 1994, a letter indicating its intent to submit ASRs for the purpose of accomplishing the rearrangements described in such section and specifying, at a minimum:

- Customer Name,
 - Access Carrier Name Abbreviations (ACNAs),
 - Carrier Identification Codes (CICs),
 - Purchase Order Number (PON),
 - Point of Presence (POP) Access Carrier Terminal Location (ACTL),
 - Desired Interface Level at POP after Rearrangement,
 - Target Completion Date for POP Rearrangement,
 - Existing Quantities Involved in Rearrangement by Number of *BellSouth SWA* DS3s, Number of *BellSouth SWA* DS1s and Number of Trunks/Lines per POP/ACTL, and
 - Expected Quantities Resulting by Number of Trunk/Lines per POP/ACTL,
- the waiver specified in E6.7.1.C.3. will apply for quantities indicated in such letter for each POP/ACTL indicated if:
- ASRs for such quantities are submitted no later than ninety days prior to the due date,
 - the due dates of those ASRs are no later than December 31, 1995, and
 - the rearrangements otherwise qualify for the waiver pursuant to the requirements of E6.7.1.C.3.

(T)

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

C. Nonrecurring Charges (Cont'd)

4. Transfer of Service

When a change in billing data (e.g., name, address, contact name, or telephone number) is requested in association with a change in the customer of record, transfer of service charges, as set forth in E6.8.12 following will apply. Charges are applied on a Billing Account Number (BAN) basis. In addition, there are separate charges for transfer of service work associated with **BellSouth SWA** lines or trunks. These charges will be assessed on a per line basis for line side connections and/or on a per trunk basis for trunk side connections.

(T)

Transactions involving only subscription changes to the customer's end users' lines are not considered a transfer of service nor a service rearrangement. Subscription change charges are found in Section E13. following.

5. BellSouth SWA 900 Service

(T)

A nonrecurring charge as specified in E6.8.3.J. following applies to the activation of 900 NXX codes to be routed to a customer in the operating territory of the Company. There are two nonrecurring charges. The first 900 NXX code nonrecurring charge applies for the first 900 NXX code submitted on an Access Service Request (ASR) and is assessed per each Company End Office and Access Tandem in which translations are required to route 900 NXX calls to the customer. The additional 900 NXX code nonrecurring charge applies for each additional 900 NXX code submitted on the same ASR and is assessed per each Company End Office and Access Tandem in which translations are required to route 900 NXX calls to the customer. In addition, rearrangement charges, as specified in E6.8.11 following, are applicable for rearrangements of existing 900 NXXs to add or delete 0+ dialing capability.

(T)

6. BellSouth SWA 500 Service

(T)

A nonrecurring charge, as specified in E6.8.13 following, applies to **BellSouth SWA** 500 service. A nonrecurring charge applies for the first 500 NXX code submitted on an Access Service Request (ASR) and is assessed per each Company End Office and Access Tandem in which translations are required to route **BellSouth SWA** 500 service calls to the customer. The additional charge applies for each additional 500 NXX code submitted on the same ASR and is assessed per each Company End Office and Access Tandem in which translations are required to route **BellSouth SWA** 500 service calls to the customer. In addition, rearrangement charges, as specified in E6.8.8 following, are applicable for rearrangements of the customer's existing trunk groups when the customer selects 0+ only or 1+ only 500 dialing capability over existing trunks and for subsequent changes in the dialing capability associated with **BellSouth SWA** 500 service.

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

D. Application of Rates

Local Switching (recurring only, including associated *BellSouth SWA Basic Serving Arrangement*) and Interconnection are applied either as premium or transitional rates only.

Switched Local Channel, *BellSouth SWA* Dedicated Interoffice Channel, *BellSouth SWA* Common Interoffice Channel, Access Tandem Switching and Channelization Equipment rates are applied as premium rates only.

The specific application of premium and transitional rates for Interconnection for a specific customer is dependent upon the type of service and the availability of equal access capabilities in the end office to which the service is provided.

The following rules provide the basis for applying the premium and transitional rates.

1. Premium rates apply to all *BellSouth SWA* FGA, *BellSouth SWA* FGB, *BellSouth SWA* LSBSA, and *BellSouth SWA* TSBSA 1 access minutes except those in 3. following, that originate from or terminate at end offices equipped with equal access (i.e., *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3) capabilities.

2. Premium rates apply:

- to all *BellSouth SWA* FGA, *BellSouth SWA* FGB, *BellSouth SWA* LSBSA, and *BellSouth SWA* TSBSA 1 terminating access minutes associated with WATS Access Lines (*a.k.a. BellSouth SPA WATS Line*) which terminate at end offices equipped with equal access (i.e., *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3) capabilities,

- to all *BellSouth SWA* FGC, *BellSouth SWA* FGD and *BellSouth SWA* TSBSA 2 and *BellSouth SWA* TSBSA 3 access minutes,

- to all *BellSouth SWA* 500 service, *BellSouth SWA* 8XX Toll Free Dialing Ten Digit Screening service or *BellSouth SWA* 900 service minutes originating from or terminating to an equal access end office and *BellSouth SWA* 500 service, *BellSouth SWA* Toll Free Dialing Ten Digit Screening service and *BellSouth SWA* 900 service minutes that originate from end offices not equipped with equal access capabilities when the customer elects to combine such traffic with its tandem routed *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 traffic.

- to all access minutes that terminate at end offices not equipped with equal access capabilities when the service is provided to customers which furnish intrastate MTS/*BellSouth SWA* WATS.

- when originating *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 is not available in an end office, and terminating *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 service to an access tandem in a LATA is available, such terminating *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 service may be used, at the option of the customer, to terminate *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 calls to that end office. Premium *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 rates apply to all access minutes associated with such calls.

- when *BellSouth SWA* FGB or *BellSouth SWA* TSBSA 1 originating is combined, at the option of the customer, with the customer's tandem routed *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 traffic.

3. Transitional rates (i.e., discounted access minute rates) apply to all *BellSouth SWA* FGA, *BellSouth SWA* FGB, *BellSouth SWA* LSBSA or *BellSouth SWA* TSBSA 1 access minutes (measured or assumed) that originate from or terminate to end offices not equipped with equal access capabilities and to all *BellSouth SWA* FGD and *BellSouth SWA* TSBSA Technical 3 access minutes used for *BellSouth SWA* 500 service, *BellSouth SWA* 8XX Toll Free Dialing Ten Digit Screening service or *BellSouth SWA* 900 service that originates from end offices not equipped with equal access capabilities except as set forth in 2. preceding.

When *BellSouth SWA* FGA, *BellSouth SWA* FGB, *BellSouth SWA* LSBSA or *BellSouth SWA* TSBSA Technical 1 service provided to an entry switch (i.e., dial tone office for *BellSouth SWA* FGA /*BellSouth SWA* LSBSA and access tandem for *BellSouth SWA* FGB/*BellSouth SWA* TSBSA 1) has usage originating from and/or terminating at both end offices that have been converted to equal access and end offices that have not been converted, the premium and transitional rates for *BellSouth SWA* Service (including Carrier Common Line) will apply in the following manner.

(T)

E6.7 Rate Regulations (Cont'd)

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

D. Application of Rates (Cont'd)

3. (Cont'd)

- a. All access minutes that originate from or terminate at the equal access end office(s) will be billed at premium rates. Originating access minutes that originate from end offices not equipped with equal access capabilities, hereinafter referred to as non-premium access minutes, will be billed at transitional rates. Transitional rates will apply as follows.

- (1) The number of non-premium access minutes to be billed at transitional rates is derived by subtracting the number of premium rated access minutes from the total number of access minutes.
- (2) Premium access minutes will be determined as set forth in E6.7.1.D. 3. b. following.

- b. The number of access minutes to be rated as premium access minutes is determined as follows:

- (1) Where measurement capability exists, and end office specific usage data is available, premium rates will apply to all access minutes originating from or terminating at equal access end offices.
- (2) Where measurement capability does not exist and/or end office specific usage data is not available, originating usage will be apportioned between premium and non premium usage as described following. The usage to be apportioned will be the recorded usage or the assumed usage as set forth in E6.7.8 following. Such apportionment will be based on the ratio of the number of subscriber lines in the access area (i.e., local calling area, LATA or end offices subtending the access tandem, as appropriate) of the entry switch that are served by equal access end offices to the total number of subscriber lines in that access area. The ratio thus developed is applied to the total measured or assumed originating **BellSouth SWA** FGA or **BellSouth SWA** LSBSA usage or originating **BellSouth SWA** FGB or **BellSouth SWA** TSBSA 1 usage, as applicable, to determine the usage to be billed at premium rates, unless adjusted as set forth in (3) following.

(T)

The ratios used to determine the premium usage will be updated on a quarterly basis. The ratios to be used for the succeeding quarter will be provided to the customer with the last bill rendered in the quarter or mailed separately within five working days after the first day of the new quarter (i.e., January, April, July and October).

For purposes of administering this provision:

- subscriber lines are defined as exchange service lines, and Centrex Type Services lines provided by the Company under its General Subscriber Services Tariff.
- the access areas for **BellSouth SWA** FGA and **BellSouth SWA** LSBSA are as set forth in E6.2.1.A.7. and E6.2.8.A.7.

E6.7.1 Description And Application Of Rates And Charges (Cont'd)

D. Application of Rates (Cont'd)

3. (Cont'd)

b. (Cont'd)

(3) Where *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 service is provided to a customer in an end office(s) where *BellSouth SWA* FGA and *BellSouth SWA* LSBSA and *BellSouth SWA* FGB and *BellSouth SWA* TSBSA 1 premium access minutes have been determined in accordance with E6.7.1.D.3.b. preceding, such premium access minutes will be adjusted in the following manner. For each *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 access minute originating from or terminating at that end office, the originating or terminating *BellSouth SWA* FGA or *BellSouth SWA* LSBSA and *BellSouth SWA* FGB or *BellSouth SWA* TSBSA 1 premium access minutes determined as set forth in E6.7.1.D.3.b. preceding will be reduced on a one for one basis, but in no event shall the reduction exceed the total number of *BellSouth SWA* FGA or *BellSouth SWA* LSBSA and *BellSouth SWA* FGB or *BellSouth SWA* TSBSA 1 premium access minutes originating from or terminating in that end office. The customer will be billed for the revised number of premium access minutes.

(T)

(4) Where *BellSouth SWA* FGD is provided, and the Company is unable to record the terminating usage with sufficient specificity to identify the access customer of record, the Billing Data information specified in E.6.6.5 preceding will be used to determine the billable access minutes.

(T)

c. Where originating and/or terminating recording capability does not exist for *BellSouth SWA* FGA or *BellSouth SWA* LSBSA Service provided to an entry switch, the number of access minutes will be assumed as set forth in E6.7.8 following.

(T)

4. Premium and originating transitional rates are also applicable to the *BellSouth SWA Basic Service Arrangement* -associated, recurring BSE billing units. Where measurement capability does not exist, recurring BSE billing units will be apportioned between premium and transitional utilizing the premium/transitional relationships for the associated *BellSouth SWA Basic Service Arrangements* as determined from the preceding rules.

(T)

The Company will provide written notification to all access customers of record within a particular LATA that an end office in that LATA is scheduled to be converted to an equal access end office. This notification will be sent, via certified U.S. Mail, to each customer of record in the LATA where the conversion is scheduled to occur, at least six months in advance of the conversion date.

The customer will have the choice of converting existing services to equal access (i.e., *BellSouth SWA* or *BellSouth SWA* TSBSA 3 service) at no charge pursuant to the conditions as set forth in E6.7.6 following or retaining the existing services. Premium rates will apply to the total access minutes beginning on the actual conversion date, whether the customer chooses to convert to *BellSouth SWA* FGD, *BellSouth SWA* TSBSA 3 or retain existing services.

E6.7.3 Reserved For Future Use

E6.7.4 Minimum Monthly Charge

- A. BellSouth SWA service is subject to a minimum monthly charge. The minimum charge applies for the total capacity provided. The minimum monthly charge consists of the following elements.
 - 1. The minimum monthly charge for Local Switching as set forth in E6.8.3 following for the measured or assumed usage for the month.
 - 2. For those rate elements that are billed a flat monthly rate, e.g. WATS Access Line (a.k.a. BellSouth SPA WATS Line), the minimum monthly charge is the monthly rate as set forth in E6.8. following.
 - 3. For dedicated BellSouth SWA Transport rate elements that are billed a flat monthly rate, the charge is the monthly rate as set forth in E6.8.1 following.

E6.7.5 Reserved for Future Use

E6.7.6 Change Of Service Category Type

Changes from one type of Service Category to another will be treated as a discontinuance of one type of service and a start of another. Nonrecurring charges will apply, with three exceptions.

- A. When a customer upgrades a BellSouth SWA FGA or BellSouth SWA FGB service to a BellSouth SWA FGD service, the nonrecurring charges will not apply if the following conditions are met:
 - 1. The same customer premises is maintained, and
 - 2. The disconnections of BellSouth SWA FGA service and the start of BellSouth SWA FGD service are within the same LATA; or the disconnections of BellSouth SWA FGB service and the start of BellSouth SWA FGD service are within the same tandem subtending area.
 - 3. In instances of BellSouth SWA FGA upgrades to BellSouth SWA FGD, to obtain credit for BellSouth SWA FGD nonrecurring charges, the customer must place an order for BellSouth SWA FGA disconnects within 180 days of conversion of the BellSouth SWA FGD end office to equal access.
 - 4. In instances of BellSouth SWA FGB upgrades to BellSouth SWA FGD, whether installed at the tandem or converting end office, the BellSouth SWA FGB disconnects must be placed within ninety days of completion of the BellSouth SWA FGD service order, with a disconnect date of no more than thirty days from the placement of the disconnect ASR, in order to obtain credit for BellSouth SWA FGD nonrecurring charges.
 - 5. In order to receive nonrecurring charge credit for the installation of BellSouth SWA FGD as outlined in a. to d. preceding, it is the responsibility of the customer to provide all related purchase order numbers pertaining to the disconnection of BellSouth SWA FGA and/or BellSouth SWA FGB service and the installation of BellSouth SWA FGD service. Nonrecurring charges will apply for the BellSouth SWA FGD service when it is installed. However, credits for the BellSouth SWA FGD nonrecurring charges will be issued upon disconnect of the BellSouth SWA FGA or BellSouth SWA FGB service. This credit will be made on a line for trunk (BellSouth SWA FGA to BellSouth SWA FGD) or trunk for trunk (BellSouth SWA FGB to BellSouth SWA FGD) basis. Provisions of E2.4 preceding do not apply to these credits for nonrecurring charges.

Note 1: References to BellSouth SWA FGs includes the corresponding BellSouth SWA Basic Serving Arrangement reference. For example, reference of an upgrade from BellSouth SWA FGA to BellSouth SWA FGD, would include the corresponding BellSouth SWA Basic Serving Arrangement upgrade from BellSouth SWA LSBSA to BellSouth SWA TSBSA 3.

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

MAY 21 2000

PURSUANT TO 807 KAR 6011,
SECTION 9(1)
BY: Stephen O. Bell
SECRETARY OF THE COMMISSION

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.6 Change Of Service Category Type (Cont'd)

- B. When a *BellSouth SWA* FGC or *BellSouth SWA* TSBSA 2 service is upgraded to a *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 service, the nonrecurring charge will not apply. Because *BellSouth SWA* FGC or *BellSouth SWA* TSBSA 2 is no longer available in an end office once the end office is equipped with equal access capabilities, (i.e., *BellSouth SWA* FGD or TSBSA 3), such upgrades will be performed by the Company without the customer being required to place an order for the change. (T)
- C. When a customer initially changes from an existing feature group service to the equivalent unbundled service (i.e., *BellSouth SWA* FGA to *BellSouth SWA* LSBSA, *BellSouth SWA* FGB to *BellSouth SWA* TSBSA 1, *BellSouth SWA* FGC to *BellSouth SWA* TSBSA 2, and *BellSouth SWA* FGD to *BellSouth SWA* TSBSA 3), the nonrecurring charge will not apply. (After the initial change of an IC's service from an existing feature group to a *BellSouth SWA Basic Serving Arrangement*, all subsequent conversions of that service from *BellSouth SWA Basic Serving Arrangement* to feature groups and vice versa will incur the applicable nonrecurring charges.) The addition of local switching optional features or BSEs, however, will incur the applicable nonrecurring charges. (T)

Billing for customers converting from *BellSouth SWA FG* service categories to unbundled service categories prior to the end of the transition period will be handled as follows: (T)

- For bill dates within the transition period, billing for the *BellSouth SWA Basic Serving Arrangement* will be effective on the customer's first bill date for that service subsequent to conversion. However, customer bills which contain billing for usage both prior to the tariff effective date and subsequent to the tariff effective date will result in a split bill. The usage prior to the effective date will be billed at the bundled *BellSouth SWA FG* rates, and the usage on or after the effective date will be billed at the unbundled *BellSouth SWA Basic Serving Arrangement* rates. Customer bills which contain billing strictly for usage after the effective date of the Tariff will be billed entirely at unbundled *BellSouth SWA Basic Serving Arrangement* rates. (T)

Billing for customers whose service is converted from *BellSouth SWA FG* service to unbundled *BellSouth SWA Basic Serving Arrangement* service at the end of the transition period will be handled as follows: (T)

- The billing for the *BellSouth SWA Basic Serving Arrangement* will be effective with the customer's first bill date for that service subsequent to conversion. All usage on the first bill subsequent to conversion will be billed at unbundled rates. (T)

When the effective dates for the disconnect and start of service are the same, the minimum period obligations will not change, (i.e., the time elapsed in the existing minimum period obligations will be credited to the minimum period obligations for *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3). When the effective dates for the disconnect and start of service are different, new minimum period obligations will be established for the *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 service. For all other changes from one type of Service Category to another, new minimum period obligations will also be established. (T)

E6.7.7 Moves

- A. A move involves a change in the physical location of one of the following:
1. The point of termination at the customer's or the customer's end user's premises
 2. The customer's premises

SECTION 9 (1)
E6. BELL SOUTH SWA SERVICE

BY: Jordan C. Neal
FOR THE PUBLIC SERVICE COMMISSION

E6.7 Rate Regulations (Cont'd)

E6.7.7 Moves (Cont'd)

- B. The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

1. Moves Within the Same Building (Inside Moves)

When the move is to a new location within the same building, service rearrangement charges as set forth in E6.7.1 will apply except as set forth following:

- When the move involves circuits associated with the move of Special Access High Capacity Services, charges as set forth in E6.8.8 will apply in addition to the appropriate charges in Section E7. of this Tariff.
- When the move involves circuits associated with Interface Group 6, charges as set forth in E6.8.8 will apply.
- When the move involves circuits associated with Interface Group 9, charges as set forth in E6.8.8 will apply.

There will be no change in the minimum period requirements.

2. Moves to a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new service. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

E6.7.8 Measuring Access Minutes

Customer traffic to end office switches will be measured (i.e., recorded or assumed) by the Company at end office switches or access tandem switches. Originating and terminating calls will be measured (i.e., recorded or assumed) by the Company to determine the basis for computing chargeable access minutes. For terminating calls over **BellSouth SWA FGA**, **BellSouth SWA FGB**, **BellSouth SWA LSBSA** and **BellSouth SWA TSBSA 1**; **BellSouth SWA FGC** or **BellSouth SWA TSBSA 2** to **BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening Service** and **BellSouth SWA FGD** or **BellSouth SWA TSBSA 3**, and for originating calls over **BellSouth SWA FGA** or **BellSouth SWA LSBSA** where the off-hook supervisory signal is provided by the customer's equipment and **BellSouth SWA FGB**, **BellSouth SWA FGD**, **BellSouth SWA TSBSA 1** or **BellSouth SWA 3**, **BellSouth 500 service**, **BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening Service**, and **BellSouth 900 service** the measured minutes are the chargeable access minutes. For originating calls over **BellSouth SWA FGA** or **BellSouth SWA LSBSA** where the off-hook supervisory signal is forwarded by the customer's equipment when the called party answers and **BellSouth SWA FGC** or **BellSouth SWA TSBSA 2**, chargeable originating access minutes are derived from recorded minutes in the following manner.

- Step 1 Obtain recorded originating minutes and messages (measured as set forth in E6.7.8.A. and C. following for **BellSouth SWA FGA** or **BellSouth SWA LSBSA** where the off-hook supervisory signal is forwarded by the customer's equipment when the called party answers and **BellSouth SWA FGC** or **BellSouth SWA TSBSA 2**, respectively) from the appropriate recording data.
- Step 2: Obtain the total attempts by dividing the originating measured messages by the completion ratio. Completion ratios (CR) are obtained separately for the major call categories such as DDD, operator, 500, 800, 900, and directory assistance from a sample study which analyzes the ultimate completion status of the total attempts which receive acknowledgment from the customer. That is, Measured Messages divided by Completion Ratio equals Total Attempts.
- Step 3: Obtain the total non-conversation time additive (NCTA) by multiplying the total attempts (obtained in Step 2) by the NCTA per attempt ratio. The NCTA per attempt ratio is obtained from the sample study identified in Step 2 by measuring the non-conversation time associated with both completed and incompleting attempts. The total NCTA is the time on a completed attempt from customer acknowledgment of receipt of call to called party answer (set up and ringing) plus the time on an incompleting attempt from customer acknowledgment of call until the access tandem or end office receives a disconnect signal (ring - no answer busy or network blockage). That is, Total Attempts times Non-Conversation Time per Attempt Ratio equals Total NCTA.
- Step 4: Obtain total chargeable originating access minutes by adding the total NCTA (obtained in Step 3) to the recorded originating measured minutes (obtained in Step 1). That is, Measured Minutes plus NCTA equals Chargeable Originating Access Minutes.

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.8 Measuring Access Minutes (Cont'd)

Following is an example which illustrates how the chargeable originating access minutes are derived from the measured originating minutes using this formula.

Where: Measured Minutes (M. Min.) = 7,000
Measured Messages (M. Mes.) = 1,000
Completion Ratio (CR) = .75
NCTA per Attempt = .4

(1) Total Attempts = 1,000 (M. Mes.) .75 (CR) = 1,333.33

(2) Total NCTA = .4 (NCTA per Attempt) x 1,333.33 = 533.33

(3) Total Chargeable Originating Access Minutes =
7,000 (M. Min) + 533.33 (NCTA) = 7,533.33

When assumed minutes are used, the assumed minutes are the chargeable access minutes.

BellSouth SWA FGA and **BellSouth SWA** LSBSA access minutes or fractions thereof, the exact value of the fraction being a function of the switch technology where the measurement is made, are accumulated over the billing period for each line or hunt group, and are then rounded up to the nearest access minute for each line or hunt group. **BellSouth SWA** FGB, **BellSouth SWA** FGC, **BellSouth SWA** FGD, and **BellSouth SWA** TSBSA access minutes or fraction thereof, the exact value of the fraction being a function of the switch technology where the measurement is made, are accumulated over the billing period for each end office, and are then rounded up to the nearest access minute for each end office.

Assumed minutes are used for **BellSouth SWA** FGA and **BellSouth SWA** LSBSA services which originate or terminate in end offices not equipped with measurement capabilities.

The assumed average access minutes used for **BellSouth SWA** FGA and **BellSouth SWA** LSBSA is as set forth following.

When a **BellSouth SWA** FGA and **BellSouth SWA** LSBSA service arranged for two-way calling is provided where the originating and/or terminating access minutes are not recorded, the assumed average intrastate access minutes, by direction, are shown following. Where one direction is measured and the other is not, the assumed minutes will not exceed the actual minutes or the sum of the originating and terminating assumed minutes, whichever is greater.

When a **BellSouth SWA** FGA and **BellSouth SWA** LSBSA service arranged for one-way (i.e., originating only or terminating only) calling is provided where the access minutes are not recorded, the assumed average intrastate access minutes of use are shown following.

	Assumed Average Intrastate Access Minutes			
	Two-Way		Originating	Terminating
	Originating	Terminating	Only	Only
Kentucky	1295	5439	4218	2812

A. **BellSouth SWA** FGA and **BellSouth SWA** LSBSA Usage Measurement

For originating calls over **BellSouth SWA** FGA and **BellSouth SWA** LSBSA, usage measurement begins when the originating **BellSouth SWA** FGA and **BellSouth SWA** LSBSA entry switch receives an off-hook supervisory signal forwarded from the customer's point of termination.

The measurement of originating call usage over **BellSouth SWA** FGA or **BellSouth SWA** LSBSA ends when the originating **BellSouth SWA** FGA or **BellSouth SWA** LSBSA entry switch receives an on-hook supervisory signal from either the originating end user's end office, indicating the originating end user has disconnected or the customer's point of termination, whichever is recognized first by the entry switch.

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.8 Measuring Access Minutes (Cont'd)

A. *BellSouth SWA FGA* and *BellSouth SWA* LSBSA Usage Measurement (Cont'd)

For terminating calls over *BellSouth SWA FGA* or *BellSouth SWA* LSBSA, usage measurement begins when the terminating *BellSouth SWA FGA* or *BellSouth SWA* LSBSA entry switch receives an off-hook supervisory signal from the terminating end user's end office, indicating the terminating end user has answered. The measurement of terminating call usage over *BellSouth SWA FGA* or *BellSouth SWA* LSBSA ends when the terminating *BellSouth SWA FGA* or *BellSouth SWA* LSBSA entry switch receives an on-hook supervisory signal from either the terminating end user's end office, indicating the terminating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

B. *BellSouth SWA* and *BellSouth SWA* TSBSA 1 Usage Measurement

For originating calls over *BellSouth SWA FGB* or *BellSouth SWA* TSBSA 1, usage measurement begins when the originating *BellSouth SWA FGB* or *BellSouth SWA* TSBSA 1 entry switch receives answer supervision forwarded from the customer's point of termination, indicating the customer's equipment has answered.

The measurement of originating call usage over *BellSouth SWA FGB* or *BellSouth SWA* TSBSA 1 ends when the originating *BellSouth SWA FGB* or *BellSouth SWA* TSBSA 1 entry switch receives disconnect supervision from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

For terminating calls over *BellSouth SWA FGB* and *BellSouth SWA* TSBSA 1, usage measurement begins when the terminating *BellSouth SWA FGB* or *BellSouth SWA* TSBSA 1 entry switch receives answer supervision from the terminating end user's end office, indicating the terminating end user has answered.

The measurement of terminating call usage over *BellSouth SWA FGB* and *BellSouth SWA* TSBSA 1 ends when the terminating *BellSouth SWA FGB* or *BellSouth SWA* TSBSA 1 entry switch receives disconnect supervision from either the terminating end user's end office, indicating the terminating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

C. *BellSouth SWA FGC* and *BellSouth SWA* TSBSA 2 Usage Measurement

For originating calls over *BellSouth SWA FGC* and *BellSouth SWA* TSBSA 2, usage measurement begins when the originating *BellSouth SWA FGC* or *BellSouth SWA* TSBSA 2 entry switch receives answer supervision from the customer's point of termination, indicating the called party has answered.

The measurement of originating call usage over *BellSouth SWA FGC* and *BellSouth SWA* TSBSA 2 ends when the originating *BellSouth SWA FGC* or *BellSouth SWA* TSBSA 2 entry switch receives disconnect supervision from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

For terminating calls over *BellSouth SWA FGC* and *BellSouth SWA* TSBSA 2 to services other than *BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening*, *BellSouth SWA 900* or *BellSouth* Directory Assistance, terminating *BellSouth SWA FGC* and *BellSouth SWA* TSBSA 2 usage may not be directly measured at the terminating entry switch, but may be imputed from originating usage, excluding usage from calls to *BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening*, *BellSouth SWA 900* or *BellSouth SWA* Directory Assistance services. Actual measured usage will be used where available rather than an imputed value.

For terminating calls over *BellSouth SWA FGC* and *BellSouth SWA* TSBSA 2 to *BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening* service, usage measurement begins when the terminating *BellSouth SWA FGC* or *BellSouth SWA* TSBSA 2 entry switch receives answer supervision from the terminating end user's end office, indicating the terminating *BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening* service end user has answered.

The measurement of terminating call usage over *BellSouth SWA FGC* and *BellSouth SWA* TSBSA 2 to *BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening* service ends when the terminating *BellSouth SWA FGC* or *BellSouth SWA* TSBSA 2 entry switch receives an on-hook supervisory signal from the terminating end user's end office, indicating the terminating *BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening* service end user has disconnected, or from the customer's point of termination, whichever is recognized first by the entry switch.

SECTION 9 (1)

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.8 Measuring Access Minutes (Cont'd)

D. *BellSouth SWA* and *BellSouth SWA* TSBSA 3 Usage Measurement

For originating calls over *BellSouth SWA* FGD and *BellSouth SWA* TSBSA 3 with multifrequency address signaling, usage measurement begins when the originating *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 entry switch receives the first wink supervisory signal forwarded from the customer's point of termination. For originating calls over *BellSouth SWA* FGD and *BellSouth SWA* TSBSA 3 with *BellSouth SWA* CCSAC, usage measurement begins when the last point of switching sends the initial address message to the customer.

The measurement of originating call usage over *BellSouth SWA* FGD and *BellSouth SWA* TSBSA 3 ends when the originating *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 entry switch receives disconnect supervision from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

For terminating calls over *BellSouth SWA* FGD and *BellSouth SWA* TSBSA 3, measurement of access minutes begins when the terminating *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 entry switch receives answer supervision from the terminating end user's end office, indicating the terminating end user has answered.

The measurement of terminating call usage over *BellSouth SWA* FGD and *BellSouth SWA* TSBSA 3 ends when the terminating *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 entry switch receives disconnect supervision from either the terminating end user's end office, indicating the terminating end user has disconnected, or the customer's point of termination, whichever is recognized first by the entry switch.

E6.7.9 Network Blocking Charge For *BellSouth SWA* FGD and *BellSouth SWA* TSBSA 3

- A. The customer will be notified by the Company to increase its capacity (quantities of trunks) when excessive trunk group blocking occurs on groups carrying *BellSouth SWA* FGD or *BellSouth SWA* TSBSA 3 traffic. Excessive trunk group blocking occurs when the blocking thresholds stated in E5.6.7 preceding are exceeded. If the order for sufficient additional capacity to handle the customer's traffic has not been received by the Company within 15 days of the notification, the Company will bill the customer, at the rate set forth in E6.8.1.G. following, for each overflow in excess of the chargeable threshold.

1. Chargeable Thresholds

a. For Trunk Groups as specified in E6.5.7.D.1.

Trunk Group Size	Allowable Overflows Per Trunk Per Month
1-2	18
3-4	19
5-6	13
7-40	10
41-139	9
140-500	8
501 or greater	7

b. For Trunk Groups as specified in E6.5.7.D.2.

Trunk Group Size	Allowable Overflows Per Trunk Per Month
1-4	10
5-6	8
7-125	6
126 or greater	5

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.10 Application Of Rates For *BellSouth SWA FGA* and *BellSouth SWA LSBSA* Extension Service

BellSouth SWA FGA and *BellSouth SWA LSBSA* service and *BellSouth SWA FGC*, *BellSouth SWA FGD*, and *BellSouth SWA TSBSA 2* and *BellSouth SWA 3 WATS* Access Lines are available with extensions, i.e., additional terminations of the service at different building(s) in the same LATA or, by access to an interexchange customer's facilities, additional terminations of the service at different building(s) in a different LATA.

BellSouth SWA FGA and *BellSouth SWA LSBSA* service is available with extensions, i.e., additional terminations of the service at different building(s) in the same LATA or, by access to an interexchange customer's facilities, additional terminations of the service at different building(s) in a different LATA. *BellSouth SWA FGA* and *BellSouth SWA LSBSA* extensions in the same Company local exchange as the dial tone office are charged for under the Company's General Subscriber Services Tariffs. *BellSouth SWA FGA* and *BellSouth SWA LSBSA* extensions in different Company local exchange as the dial tone office are charged for as Special Access Service. The rate elements which apply are: Voice Grade Local Channels, associated Voice Grade Interoffice Channel Mileage, if applicable, and a signaling capability (optional features and functions), if applicable. All appropriate monthly rates and nonrecurring charges as set forth in Section E7. following will apply. Such extensions are ordered as set forth in E5.2 preceding.

E6.7.11 Message Unit Credit

- A. Calls from end users to the seven digit local telephone numbers associated with *BellSouth SWA FGA* and *BellSouth SWA LSBSA* service are subject to Company General Subscriber Services Tariff charges (including message unit and toll charges as applicable). The monthly bills rendered to customers for their *BellSouth SWA FGA* and *BellSouth SWA LSBSA* service and to customer's end users for *BellSouth SWA FGA* and *BellSouth SWA LSBSA* FX/ONAL type service will include a credit to reflect any message unit charges collected from their end users under the Company's General Subscriber Services Tariffs.
- B. The credit will apply for recorded originating usage or for assumed originating usage, as appropriate for the *BellSouth SWA FGA* or *BellSouth SWA LSBSA* service provided. When the credit is applied on assumed usage, such credit will not exceed the assumed levels of usage set forth in E6.7.8 preceding. No credit will apply for any terminating *BellSouth SWA FGA* or *BellSouth SWA LSBSA* access minutes. The message unit credit for originating *BellSouth SWA FGA* or *BellSouth SWA LSBSA* access minutes is as follows:

Message Unit Credit

Credit Per Originating
BellSouth SWA FGA/BellSouth SWA LSBSA Access Minute
\$.00149

E6.7.12 Local Information Delivery Services

Calls over *BellSouth SWA* service in the terminating direction to certain community information services will be rated under the applicable rates for *BellSouth SWA* service as set forth in E6.8 following. In addition, the charges per call as specified under the Company's General Subscriber Services Tariff will apply.

E6.7.13 Mileage Measurement

- A. The mileage to be used to determine the monthly rate for the *BellSouth SWA* transport is calculated on the airline distance using the V&H coordinates method as set forth in Section E10.
- B. To determine the rate to be billed, first compute the mileage using the V&H coordinates method for the points involved, then apply the per mile rate shown. If the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage band before applying the rates.

EFFECTIVE: August 1, 1998

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.13 Mileage Measurement (Cont'd)

- C. For BellSouth SWA Dedicated Transport, mileage will be calculated between customer designated points, i.e., (1) customer's serving wire center (SWC) and customer designated Company end office, (2) SWC and an Access Tandem, (3) SWC to a Company Facility Hub (Hub), (4) a Hub and an Access Tandem, (5) a Hub to an end office, and (6) a Hub to a Hub.

BellSouth SWA Common Transport mileage will be measured from the Access Tandem to the end office.

(DELETED)

Exceptions to the mileage measurement rules are set forth in 1. through 8. following.

1. BellSouth SWA FGA and BellSouth SWA LSBSA service will be provisioned with a Switched Local Channel from the customer's premises to the customer's serving wire center.

BellSouth SWA FGA and BellSouth SWA LSBSA service will be provisioned as BellSouth SWA Dedicated Transport from the selected end office (dial tone office) to the customer's serving wire center.

BellSouth SWA FGA and BellSouth SWA LSBSA service, when used in the terminating direction, will be provisioned and billed as BellSouth SWA Common Transport, less the Access Tandem Switching charge, for traffic terminating within the LATA but beyond the selected end office (dial tone office) to the terminating end office.

Mileage for BellSouth SWA FGA and BellSouth SWA LSBSA traffic terminating within the LATA but beyond the selected end office (dial tone office), BellSouth SWA Common Transport will be measured from the selected end office (dial tone office) to the terminating office.

For BellSouth SWA FGA/BellSouth SWA LSBSA traffic terminating within the LATA but beyond the selected end office (dial tone office), BellSouth SWA Common Transport mileage will be measured from the selected end office (dial tone office) to the terminating end office.

Mileage for BellSouth SWA FGA and BellSouth SWA LSBSA service will be calculated on an airline basis, using the V&H coordinates method. Mileage for BellSouth SWA FGA and BellSouth SWA LSBSA will be measured from the selected end office (dial tone office) to the customer's serving wire center as BellSouth SWA Dedicated Transport.

2. When the Alternate Traffic Routing optional feature is provided with BellSouth SWA FGB, BellSouth SWA FGC, BellSouth SWA FGD, BellSouth SWA TSBSA, BellSouth SWA 500 service, BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service and BellSouth SWA 900 service, to provide service from an end office to different customer premises locations, the BellSouth SWA transport access minutes will be apportioned between the two transmission routes used to provide this feature. For BellSouth SWA FGB, BellSouth SWA FGC and BellSouth SWA TSBSA 1 and BellSouth SWA 2 and such apportionment will be made using standard Company traffic engineering methodology and will be based on the last trunk CCS desired for the high usage group, as described in E6.3.2 preceding, and the relative capacity ordered to the end office, when the feature is provided at an end office switch, or to the subtending end offices when the feature is provided at an access tandem switch. For BellSouth SWA FGD and BellSouth SWA TSBSA 3, BellSouth SWA 500 service, BellSouth SWA 8XX Toll Free Dialing Ten Digit Screening service and BellSouth SWA 900 service, the apportionment will be based on the actual measured data which is recorded against the specific trunk group that carried a particular call. This apportionment will serve as the basis for the BellSouth SWA Transport mileage calculation. The customer will be billed accordingly.

E6. BELLSOUTH SWA SERVICE

(T)

E6.7 Rate Regulations (Cont'd)

E6.7.13 Mileage Measurement (Cont'd)

C. Exceptions to the mileage measurement rules are as follows: (Cont'd)

3. Where the End Office is a remote switching system or module (RSS or RSM), **BellSouth SWA** Common and/or **BellSouth SWA** Dedicated Transport mileage, as applicable, will be calculated to the end office that serves as the Host Office (Host) for the RSS or RSM (as if the host were the end office), and an additional mileage calculation will be made for a **BellSouth SWA** Common Interoffice Channel between the host for the RSS or RSM and the RSS or RSM. (T)
4. When terminating **BellSouth SWA FGB**, **BellSouth SWA FGC** or **BellSouth SWA** TSBSA **BellSouth SWA** 1 or **BellSouth SWA** TSBSA 2 service is provided from multiple customer premises to an end office not equipped with measurement capabilities the total **BellSouth SWA** Transport access minutes for that end office will be apportioned among the trunk groups accessing the end office on the basis of the individual capacity (i.e., trunks) ordered for each of those trunk groups. This apportionment will serve as the basis for **BellSouth SWA** Transport mileage calculation. The customer will be billed accordingly. (T)
5. The **BellSouth SWA** Transport mileage for **BellSouth SWA** FGC, **BellSouth SWA** FGD, **BellSouth SWA** TSBSA 2 or **BellSouth SWA** TSBSA 3 minutes which originate from or terminate to a WATS Access Line (*a.k.a. WATS Line*) and **BellSouth SWA** FGA, **BellSouth SWA** LSBSA 1 which terminates to a WATS Access Line (*a.k.a. WATS Line*) will be calculated on an airline basis, the WATS Serving Office at which the WATS Access Line (*a.k.a. WATS Line*) or WATS Access Line (*a.k.a. WATS Line*) Extension terminates. When **BellSouth SWA** FGA, **BellSouth SWA** FGB, **BellSouth SWA** LSBSA or **BellSouth SWA** TSBSA 1 usage terminating to a WATS Access Line (*a.k.a. WATS Line*) is transported over a **BellSouth SWA** FGA or **BellSouth SWA** LSBSA Line or **BellSouth SWA** FGB or **BellSouth SWA** TSBSA. (T)
6. The **BellSouth SWA** Transport mileage for **BellSouth SWA** FGB, **BellSouth SWA** FGD and **BellSouth SWA** TSBSA 1 and **BellSouth SWA** TSBSA 3 service provided to Mobile Telephone Serving Offices (MTSOs) directly interconnected to a Company access tandem office will be determined on airline basis, using the V&H coordinate method. The mileage measured will be measured between the customer's serving wire center and the Company access tandem office to which the Mobile Telephone Service Office (MTSO) is interconnected. (T)

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

FEB 16 1997

PURSUANT TO 807 KAR 5.011,
SECTION 9 (1)

BY: Jordan C. Neel
FOR THE PUBLIC SERVICE COMMISSION

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.14 Shared Use

- A. Shared Use occurs when BellSouth SWA service and Special Access (a.k.a. BellSouth SPA) service are provided over the same analog or digital high capacity facility through a common interface. The regulations governing the provision of Shared Use Facilities are set forth in E7.4.8 following. BellSouth SWA rates and charges as set forth in E6.8 following will apply for each channel of the high capacity facility that is used to provide BellSouth SWA service.
- B. When the customer orders BellSouth Dedicated Ring, the facilities will be rated as BellSouth Dedicated Ring (i.e., Local Channel, Interoffice Channel, as appropriate, and Channelization System and Central Office Channel Interface(s), if applicable) until such time as the customer chooses to use a portion of the available capacity for providing Special Access (a.k.a. BellSouth SPA) service. When individual channels are activated for Special Access (a.k.a. BellSouth SPA), the BellSouth Dedicated Ring Local Channel rates, Interoffice Channel rates, and Channelization System rates, if applicable, will be reduced via a reduction factor. The reduction factor will be developed using the net number of Special Access (a.k.a. BellSouth SPA) services provided over a BellSouth Dedicated Ring at the beginning of a monthly billing period.
- C. Virtual Collocation Cross-Connects provide a means for customers to interconnect their virtual collocation arrangements to their BellSouth SWA DS1 and BellSouth SWA DS3 Local Channels, Interoffice Channels and Channelization equipment within the same central office. Virtual Collocation Cross-Connect rates and charges for these features are provided in E6.8.1 following. (N)
- D. The capability exists for a customer to utilize all or part of a BellSouth Dedicated Ring to transport Special Access (a.k.a. BellSouth SPA) service provided the BellSouth Dedicated Ring channel interface transporting the Special Access (a.k.a. BellSouth SPA) does not have FlexServ[®] service (a.k.a. BellSouth SPA Customer Reconfiguration) capability. The customer must place an order for each individual Special Access (a.k.a. BellSouth SPA) channel provided over BellSouth SWA Shared Use Facilities and specify the channel assignment for each such service. The Special Access (a.k.a. BellSouth SPA) traffic would enter and exit the BellSouth Dedicated Ring at Customer and Central Office Nodes on that network. When this occurs, ratcheting of BellSouth Dedicated Ring rate elements (i.e. Nodes, Channel Interfaces, Local Channels, Alternate Central Office Channels, Internodal Channels, or Interoffice Channels) will be based on the number of voice grade (BellSouth SWA DS0 VG) equivalent trunks/lines of that rate element used for Special Access (a.k.a. BellSouth SPA). Reduction factors will be developed to reduce the charges on system level billing as well as the billing on individual DS1, DS3, STS-1, OC-3, and/or OC-12 Channel Interfaces. For ratcheting purposes, the system level charges include Customer Nodes, Central Office Nodes, Local Channels, Alternate Central Office Channels, Internodal Channels, and Interoffice Channels as appropriate to make up a customer's BellSouth Dedicated Ring. Individual OC-1, OC-3 and OC-12 Channel Interfaces used in Overlay Ring Arrangements will be ratcheted as system level charges. The system reduction factor will apply to the system level charges. (T)
- E.. The system reduction factor will be derived by dividing the number of activated Special Access (a.k.a. BellSouth SPA) circuits by the voice grade (BellSouth SWA DS0 VG) channel equivalent capacity of the self-healing ring. An OC-1 BellSouth Dedicated Ring has 672 voice grade (BellSouth SWA DS0 VG) equivalent channels. A BellSouth Dedicated Ring has 2,016 voice grade (BellSouth SWA DS0 VG) equivalent channels. An OC-3+ or OC-12 BellSouth Dedicated Ring has 8,064 voice grade equivalent channels. An OC-48 BellSouth Dedicated Ring or OC-48+ BellSouth Dedicated Ring with 48 or less activated DS3s has 32,256 voice grade (BellSouth SWA DS0 VG) equivalent channels. (T)
- F. However, when an OC-48+ BellSouth Dedicated Ring is used to transport Special Access (a.k.a. BellSouth SPA), and more than 48 equivalent DS3s are activated on the service, the factor will be based upon the actual number of activated DS3s times 672 DS0s. A factor for individual DS3 channel interfaces and 28 DS1 channel systems, will be derived by dividing the number of activated Special Access (a.k.a. BellSouth SPA) circuits associated with the DS3 channel by the voice grade (BellSouth SWA DS0 VG) equivalent capacity of the DS3 channel. A DS3 has 672 voice grade (BellSouth SWA DS0 VG) equivalent channels. For DS1 channel interfaces, a factor is derived by dividing the number of Special Access (a.k.a. BellSouth SPA) circuits associated with the DS1 channel by the voice grade (BellSouth SWA DS0 VG) equivalent capacity of the DS1 channel, which is 24. Each reduction factor is rounded to four decimal places and then multiplied against the respective monthly charges to determine the reduction amount. (T)
- G. BellSouth Dedicated Ring rates and charges as set forth in E6.8.1 following will apply for each channel of the shared use facility that is used to provide BellSouth SWA service. (T)

E6.7.15 Facility Hubs

- A. A customer has the option of ordering digital high capacity facilities (i.e., DS1, or DS3) to a Facility Hub for channelization of individual services requiring lower capacity facilities.
- B. **Different** locations may be designated as Hubs for different facility capacities, e.g., channelization from digital to digital may occur at one location while channelization from digital to analog may occur at a different location. When ordering, the customer will specify the desired channelization Hub(s) selected from the NECA No. 4. This tariff identifies the type(s) of channelization functions which are available and the Company serving wire centers at which they are available. For additional information on Facility Hubs refer to E7.4.7 following. (T)

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

PURSUANT TO 807 KAR 50.11,
SECTION 9 (1)
BY: Stephan O Bell
SECRETARY OF THE COMMISSION

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.16 Information Surcharge

- A. The Information Surcharge is a charge to recover costs that have been assigned to the intrastate Information category through Parts 36 and 69 of the Federal Communications Commission's Rules. These costs are other than those incurred in the provision of intrastate BellSouth Directory Assistance Access Service as set forth in Section E9. following.
- B. The Information Surcharge is assessed to the customer based on the total number of access minutes. The rates are set forth in E6.8.7 following. The application of these rates with respect to the individual service categories is as set forth in E6.7.1.D. preceding.

E6.7.17 Reserved For Future Use

E6.7.18 Shared Network Arrangement

- A. Shared Network Arrangement provides for multiple customers to connect their individual services on channelized High Capacity Service. These service configurations will be limited to DS3 Service customers sharing capacity with other sub-DS3 service customers and/or DS1 Service customers sharing capacity with other sub-DS1 customers. A description of this service offering and the regulations governing the provision of Shared Network Arrangements are set forth in E5.4 preceding.
- B. A one-time coordination charge will be assessed with the establishment of a Shared Network Arrangement. In addition to the coordination charge, a separate nonrecurring charge will apply to each service order on a shared network account. Applicable nonrecurring charges apply as set forth in E6.8.10 following.

E6.7.19 Reserved for Future Use

E6.7.20 Reserved for Future Use

E6.7.21 Reserved for Future Use

E6.7.22 BellSouth® Remote Access Service

- A. Rates and charges as specified in E6.8.3.E.13 following apply for BellSouth® Remote Access Service.
 1. *On or after November 4, 2002*, BellSouth® Remote Access Service initial request *to establish service* provides a *minimum* capacity of *644* one-way ports per dial tone office. *Customers in service prior to November 4, 2002 may continue their service with a minimum capacity of 276 one-way ports.* (C)
 2. BellSouth® Remote Access Service subsequent request provides a capacity of 23 one-way ports per dial tone office *(where capacity allows).* (C)
- B. The customer is responsible for all interface support for clients and/or employees.
- C. BellSouth® Remote Access Service, available with BellSouth® SWA LSBSA, is provided from suitably equipped Telephone Company offices. These offices are identified in the NATIONAL EXCHANGE CARRIER EXCHANGE ASSOCIATION (NECA) TARIFF F.C.C. No. 4.
- D. BellSouth® Remote Access Service, available with BellSouth® SWA LSBSA, is available on a one to one basis, i.e., one LSBSA, one BellSouth® Remote Access Service port.
- E. Service intervals for BellSouth® Remote Access Service, available with BellSouth® SWA LSBSA, will be negotiated.

E6.7.23 Zone Pricing - Switched Transport

BellSouth SWA Transport Service is organized into three pricing zones. Rate levels for Switched Local Channel, Switched Interoffice Channels and Channelization Systems will be billed in accordance with the pricing zone assignment of the IC's serving wire center. The pricing zone assignment for each Company serving wire center is specified in the National Exchange Carrier Association (NECA) Tariff F.C.C. No. 4.

Interoffice Channels, which terminate in offices in different zones, will carry the higher rate. When interoffice channels are provided by more than one Telephone Company, this Company's portion of the circuit will be billed at the zone rate of this Company's central office, and the other Telephone Company's portion of that circuit will be billed in accordance with that Company's tariff, pursuant to E2.4.8 preceding. Channelization rates will be determined by the location of the channelization arrangement.

E6.7.24 Reserved for Future Use

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

NOV 04 2002

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.25 BellSouth Dedicated Ring

- A. Monthly rates and charges as specified in E6.8.1 following apply for each BellSouth Dedicated Ring. Customers must specify network capacity at the time of the initial order. In an Overlay Ring Arrangement where a customer's overlaying BellSouth Dedicated Ring rides the customer's host BellSouth Dedicated Ring, the overlay ring will share the transport of the host ring between common node locations. Rate categories at OC-3, OC-3+, OC-12, OC-48, OC-48+, **OC-192** and **OC-192+** capacity levels include Customer Nodes, Central Office Nodes, Local Channels, Alternate Central Office Channels, Interoffice Channels and Internodal Channels. Rate categories for OC-1 BellSouth Dedicated Ring include Customer Nodes and Central Office Nodes. Channel Interfaces are required at each node on the network and must be associated with a BellSouth Dedicated Ring. An OC-1 Overlay Ring Arrangement requires an OC-1 Channel Interface at each node involved. An OC-3 Overlay Ring Arrangement requires an OC-3 Channel Interface at each node involved. An OC-3+ or OC-12 Overlay Ring Arrangement requires an OC-12 Channel Interface at each node involved. **An OC-48 or OC-48+ Overlay Ring Arrangement requires an OC-48 Channel Interface at each node involved.** In Overlay Ring Arrangements, the customer must order a Channel Interface for each entry to or exit from the host ring. In all other situations, the number of Channel Interfaces ordered will depend on whether the customer desires a working interface, or a working interface and a protection interface. The quantity of channel interfaces ordered may not exceed the capacity ordered. When a 28 DS1 Channel System is utilized to activate DS1 channels, the appropriate number of DS1 Channel Interfaces are required in lieu of an originating or terminating DS3 or STS-1 Channel Interface. (C)
- B. Nonrecurring charges for Local, Alternate Central Office, Interoffice and Internodal Channels apply for each channel for month-to-month customers. Nonrecurring charges are not applicable when the ring level rate elements are ordered under TPP arrangements.
- C. BellSouth Dedicated Ring rate elements are defined as following: Local Channel, Interoffice Channel, Internodal Channel, Alternate Central Office Channel, Customer Node and Central Office Node. Nonrecurring charges do apply for the Channel Interface Reallocation rate element for TPP customers. When the customer requests two separate routes and the routing is provided as described in E6.2.11.A preceding, charges apply for the Local Channels and any Interoffice Channels on the requested route. Recurring charges for Local, Alternate Central Office, Interoffice and Internodal Channels apply for each quarter air mile increment of the channel. Fractions of a quarter mile will always round up to the next quarter air mile before determining the mileage and applying the rate. For channels which are less than one quarter mile, a minimum charge of one quarter mile applies.
- D. For Internodal Channels, charges apply as appropriate either for the same wire center area or contiguous serving wire center areas, as specified in E6.8.1.
- E. Nonrecurring charges for Customer Nodes and Central Office Nodes apply per node for month-to-month customers and are based upon the capacity of the ring configuration. Nonrecurring charges are not applicable when the preceding rate elements are ordered under TPP arrangements. Recurring rates for Customer and Central Office Nodes apply per node and are also based upon the capacity of the ring configuration.
- F. When the customer orders an OC-1 BellSouth Dedicated Ring Overlay Ring Arrangement riding the customer's host OC-12, OC-48, or OC-48+ BellSouth Dedicated Ring, recurring charges apply per OC-1 Customer Node and/or OC-1 Central Office Node, in addition to the recurring and nonrecurring charges for associated Channel Interfaces.
- G. When the customer orders an OC-3 BellSouth Dedicated Ring Overlay Ring Arrangement riding the customer's host OC-12, OC-48, OC-48+, **OC-192** or **OC-192+** BellSouth Dedicated Ring, recurring charges apply per OC-3 Customer Node and/or OC-3 Central Office Node, in addition to the recurring and nonrecurring charges for associated Channel Interfaces. Nonrecurring charges only apply for month-to-month customers. (C)
- H. When the customer orders an **OC-3**, OC-3+ or OC-12 Overlay Ring Arrangement riding the customer's host OC-48 BellSouth Dedicated Ring, recurring charges apply per **OC-3**, OC-3+ and/or OC-12 Customer Node and/or per OC-3+ and/or OC-12 Central Office Node, in addition to the charges for associated Channel Interfaces. Nonrecurring charges only apply for month-to-month customers. (C)
- I. In all Overlay Ring Arrangements, the number of OC-1, OC-3, OC-12 and/or **OC-48** Channel Interfaces required will be based upon the characteristics of the overlaying ring. (C)
- J. The rates for Customer Channel Interfaces apply for each origination and for each termination of an activated DS1, DS3, STS-1, OC-3, OC-12 and/or **OC-48 interface** at the Customer Node. Nonrecurring charges are established on a per order basis for the first DS1, DS3, STS-1, OC-3, OC-12 and/or **OC-48 interface** which originates or terminates at a Customer Node and for each additional DS1, DS3, STS-1, OC-3, OC-12 and/or **OC-48 interface** which originates or terminates at the same Customer Node. The recurring rate applies on a per Customer Node basis for each origination and for each termination of an activated DS3 and/or DS1 at a Customer Node. (C)

NOV 28 2003

PURSUANT TO 807 KAR 5.011
SECTION 9(1)

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.25 BellSouth Dedicated Ring (Cont'd)

(T)

- K. In addition, OC-12 and or OC-48 customers with DS3 and/or STS-1 interfaces at the Customer Node electing to connect with DS1 services at a Central Office Node, must obtain a 28 DS1 Channel System and the appropriate number of DS1 Channel Interfaces in lieu of a DS3 or STS-1 Channel Interface. A maximum of 28 DS1 Channel Interfaces can be activated for each 28 DS1 Channel System utilized. Nonrecurring charges are established on a per order basis for the first 28 DS1 Channel System and for each additional 28 DS1 Channel System at that same Central Office Node. Nonrecurring charges are also established for the first DS1 Channel Interface which originates/terminates in a 28 DS1 Channel System and each additional DS1 Channel Interface which originates/terminates in that same DS1 Channel System. For DS1 Channel Systems, nonrecurring charges only apply for month-to-month customers. The recurring rate applies for each 28 DS1 Channel System and each DS1 Channel Interface activated per Central Office Node.
- L. In order to accommodate more flexible customer situations, BellSouth Dedicated Ring is available under several TPP arrangements: Plan A (12-36 Months), Plan B (37-60 Months) or Plan C (61-96 Months). Month-to-month arrangements (with a minimum of four months) are available for BellSouth Dedicated Ring.
- M. TPP arrangements are provided under the terms and conditions specified in E2.4.9 preceding, except as modified following. For all payment plans, the following regulations apply:
1. BellSouth Dedicated Ring, whether initially or subsequently ordered, in conjunction with SMARTRing[®] service (a.k.a. BellSouth SPA Dedicated Ring) must be provided under the same TPP payment plan with the same service period and both services are to be coterminous.

All rate elements, for a given BellSouth Dedicated Ring, whether initially or subsequently ordered, must be provided under the same payment plan with the same service period and are coterminous upon disconnect of the BellSouth Dedicated Ring. However, Channel Interfaces, except those utilized to interface an overlaying ring with its host ring, may be provided under a month-to-month arrangement which is equal to or less than the payment plan for the associated BellSouth Dedicated Ring.

In a shared network arrangement, where the host subscriber and the connecting service user subscribes to services under TPP arrangements, the payment periods for directly associated channelized rate elements must be equal to or less than the payment periods for the host service, or the service user must order those rate elements under month-to-month payment terms. Where the host subscriber receives services under month-to-month payment terms, a connecting user must also receive directly associated channelized rate elements under month-to-month payment terms.
 2. The rates applicable to a month-to-month payment plan are subject to Company initiated charges.
 3. Termination liability charges for BellSouth Dedicated Ring TPP customers are applicable as specified in E2.4.9.C preceding.
 4. When a service period under a TPP arrangement is completed and a customer elects to revert to a month-to-month payment option, no minimum period is applicable.

The TPP customer of record will have a 60 day grace period after which month-to-month rates will apply.
 5. Customers may upgrade from a lower capacity BellSouth Dedicated Ring to a higher capacity BellSouth Dedicated Ring without incurring any termination charges if the following conditions are met:
 - a. the order for the upgraded BellSouth Dedicated Ring and the order for the disconnect of the existing BellSouth Dedicated Ring are received by the Company at the same time,
 - b. the new BellSouth Dedicated Ring is provided between the same customer and Central Office locations as the discontinued BellSouth Dedicated Ring,
 - c. the number of Channel Interfaces activated under the new capacity BellSouth Dedicated Ring is greater than the number of Channel Interfaces activated under the existing capacity BellSouth Dedicated Ring,
 - d. the expiration date of the new BellSouth Dedicated Ring payment plan is subsequent to the payment plan of the ring being discontinued.
 6. Customers may also upgrade existing BellSouth Dedicated Ring to a new BellSouth Dedicated Ring of the same capacity without incurring a termination liability charge, if the customer is concurrently ordering a new capability which cannot be provisioned with the existing BellSouth Dedicated Ring and if the conditions set forth in 5. preceding are met.
 7. BellSouth Dedicated Ring and the applicable rates will commence beginning with the date a customer orders service. However, where ordering and billing processes have not yet been converted to BellSouth Dedicated Ring, the customer must order any additional services to be provided under BellSouth Dedicated Ring as existing tariffed services and be billed under tariff rates which would apply for such services, with monthly billing adjustments made to such billing to assure application of the appropriate BellSouth Dedicated Ring rates.

E6. BELLSOUTH SWA SERVICE

E6.7 Rate Regulations (Cont'd)

E6.7.26 Channels For Use With BellSouth Managed Shared Ring Service

- A. Rates and charges as specified in E6.8.1 following apply on a per Off-Net BellSouth Managed Shared Ring service DS1 or DS3 basis, as applicable. The minimum service period for each Off-Net DS1 or DS3 BellSouth Managed Shared Ring service channel is four months. The rates and charges for Common Transport are in addition to the Off-Net BellSouth Managed Shared Ring service channel rates and charges.
- B. BellSouth Managed Shared Ring service is available in the BellSouth Telecommunications, Inc. Tariff F.C.C. No.1 under commitment plans as follows: Month-to-Month, Plan A (36 Months), or Plan B (60 Months). Month-to-Month rates are only available upon completion of a Plan A or Plan B commitment plan. Upon the completion of a Plan A or Plan B commitment period, the customer must establish a new commitment plan or billing will be changed to month-to-month. The rates in this Tariff for channels for use with BellSouth Managed Shared Ring service will be based on time period for the commitment plan established for the service in the BellSouth Telecommunications, Inc. Tariff F.C.C. No. 1.
- C. The rates for channels for use with BellSouth Managed Shared Ring service commitment plans are stabilized for the length of the plan selected for the service arrangement in the interstate tariff and are exempt from Telephone Company initiated increases, however, decreases will automatically flow through to the customer.

E6.7.27 Virtual Collocation Cross-Connects

- A. A monthly recurring charge, as set forth in E6.8.1 following, applies for BellSouth SWA DS1 and BellSouth SWA DS3 Cross-Connect rate elements.
- B. BellSouth SWA DS1 and BellSouth SWA DS3 Cross-Connect rate elements are subject to the jurisdictional report requirements as set forth in E2.3.14 of this Tariff.
- C. Nonrecurring charges for BellSouth SWA DS1 and BellSouth SWA DS3 Cross-Connects are assessed on a "First" and "Additional" basis.

E6.7.28 Channels For Use With BellSouth SWA Managed Shared Network Service

- A. Rates and charges as specified in E6.8.1 following apply on a per DS3 Local Channel, DS1 or DS0 Interface and DS1 or DS0 Interoffice Channel basis, as applicable. The minimum service period for each BellSouth SWA Managed Shared Network Service rate element is four months. The rates and charges for Local Switching and Common Line are in addition to the BellSouth SWA Managed Shared Network Service rates and charges. (N)
- B. BellSouth SWA Managed Shared Network Service is available in the BellSouth Telecommunications, Inc. Tariff F.C.C. No.1 under commitment plans as follows: Month-to-Month, Plan A (12 Months), or Plan B (60 Months). Month-to-Month rates are only available upon completion of a Plan A or Plan B commitment plan. Upon the completion of a Plan A or Plan B commitment period, the customer must establish a new commitment plan or billing will be changed to month-to-month. The rates in this Tariff for channels for use with BellSouth Managed Shared Ring service will be based on time period for the commitment plan established for the service in the BellSouth Telecommunications, Inc. Tariff F.C.C. No. 1. (N)
- C. The rates for channels for use with BellSouth SWA Managed Shared Network Service commitment plans are stabilized for the length of the plan selected for the service arrangement in the interstate tariff and are exempt from Telephone Company initiated increases, however, decreases will automatically flow through to the customer.
